

INDEX

<i>F.Schipp</i> : József Mogyoródi 1933-1990	3
List of publications of József Mogyoródi	5
<i>Bassily N.L., Ishak S., J.Mogyoródi</i> : On stable and mixing sequences of σ -fields	11
<i>Gasanenko V.A.</i> : Applications of thinning processes	35
<i>Bassily N.L.</i> : On an inequality of M.J.Klass	53
<i>Bassily N.L.</i> : On two-sided inequalities for stopped random walks in Orlicz-spaces	63
<i>Bassily N.L., Ishak S.</i> : Wald's indentity, Blackwell's theorem, and Gut and Janson's theorem using martingale techniques	75
<i>Argyros I.K.</i> : Iterations converging faster than Newton's method to the solutions of nonlinear equations in Banach space	97
<i>Bojeldain A.A.</i> : On the numerical solving of nonlinear Volterra integro- differential equations	105
<i>Doha E.H.</i> : Recurrence relations for the coefficients in ultraspherical series solutions of ordinary differential equations	127
<i>Granados B.</i> : FFT method for biorthogonal expansion with respect to integrated Walsh functions	147
<i>László L.</i> : Optimal plane rotations for complex matrices	155
<i>Rahman N.A.A.</i> : Approximate solution of the differential equation with spline function	165
<i>Tchirkov M.K.</i> : On matrix methods for optimization of generalized automata	175
<i>Zubiri J.</i> : Conditions for optimality of $C(S)$ -valued functions	193

ANNALES UNIVERSITATIS SCIENTIARUM
BUDAPESTINENSIS
DE ROLANDO EÖTVÖS NOMINATAE
SECTIO COMPUTATORICA

Publication. Yearly 1 or 2 issues (about 150 p. each) are scheduled to appear, which are available – mainly through exchange – from the library of the Computing Center of the Eötvös Loránd University Budapest, Bogdánfy u. 10/b.

Editorial Policy. This journal will publish research and, in special cases, survey papers treating problems from a broad field of applied mathematics written with mathematical precision, giving priorities to articles connected with the activities and interests within the departments of applied mathematics of the Eötvös University. The areas of main interest are: classical numerical analysis, modern theories of algorithms of approximation, their optimization both in deterministic and stochastic cases, summation of series, modelling and simulation, mathematical system theory, estimations of computational complexity, theory of automata, languages and systems programming. Reviews of new books, both from and outside Hungary, will be published also.

Instruction for authors. Manuscripts should be submitted in two exemplars or on magnetic discs (using text preparation programs as $\text{T}_{\text{E}}\text{X}$, \LaTeX) – written in English or German, and prepared in form as the ones already appeared – to the editor-in-chief
