<i>Kátai I.</i> : Karl-Heinz Indlekofer	5
List of publications of Karl-Heinz Indlekofer	7
<i>Bassily N.L.</i> : Distribution of q-ary digits in some sequences of integers ...	13
<i>Daróczy Z.</i> : On a functional equation connected with an identity of Ramanujan	23
<i>Fehér J.</i> : Über die Eindeutigkeits-, Zulässigkeits- und (mod 1) Eindeutig- keitsmengen \mathbb{R} -additiver Funktionen	33
<i>Fehér J.</i> : On integer valued multiplicative and additive arith- metical functions	39
<i>Fridli S.</i> : Convergence classes of Walsh-Fejér means in homogeneous Banach spaces	47
<i>Gát G.</i> : Investigation of some operators with respect to Vilenkin-like systems	61
<i>Járai A.</i> : On analytic solutions of functional equations	71
<i>Jäger M.</i> : The Hausdorff-dimension of the boundary of the unit-interval of a number system	79
<i>Kátai I.</i> : Number systems in imaginary quadratic fields	91
<i>Lakatos L.</i> : On a simple continuous cyclic-waiting problem	105
<i>Manstavičius E.</i> : Distribution of the traditionally normalized additive functions	115
<i>Mauclaire J.-L.</i> : On the regularity of additive arithmetical functions with values in a locally compact group	135
<i>Phong B. M.</i> : On the distribution of Lucas and Lehmer pseudoprimes ...	145
<i>Phong B. M.</i> : Characterization of pairs of additive functions with values in compact Abelian groups	165
<i>Schipp F.</i> : On fast Fourier algorithms	175

<i>Szeidl L.:</i> On power processes defined by independent identically distributed random variables having regularly varying distribution function at the infinity	189
<i>Varbanec P. D.:</i> Trigonometric sums and their applications	219
<i>Wagner R.:</i> Über die Verteilung der B-Elemente in einem Polynomring über einem endlichen Körper	241
<i>Weisz F.:</i> One-parameter martingale inequalities	249
<i>Wijsmuller M.:</i> The value distribution of an additive function	279

**ANNALES UNIVERSITATIS SCIENTIARUM
BUDAPESTINENSIS
DE ROLANDO EÖTVÖS NOMINATAE
SECTIO COMPUTATORICA**

Publication. Yearly 1 or 2 issues (about 150 p. each) are scheduled to appear, which are available – mainly through exchange – from the library of the Computing Center of the Eötvös Loránd University Budapest, Bogdánfy u. 10/b.

Editorial Policy. This journal will publish research and, in special cases, survey papers treating problems from a broad field of applied mathematics written with mathematical precision, giving priorities to articles connected with the activities and interests within the departments of applied mathematics of the Eötvös University. The areas of main interest are: classical numerical analysis, modern theories of algorithms of approximation, their optimization both in deterministic and stochastic cases, summation of series, modelling and simulation, mathematical system theory, estimations of computational complexity, theory of automata, languages and systems programming. Reviews of new books, both from and outside Hungary, will be published also.

Instruction for authors. Manuscripts should be submitted in two exemplars or on magnetic discs (using text preparation programs as $\text{T}_{\text{E}}\text{X}$, $\text{L}_{\text{A}}\text{T}_{\text{E}}\text{X}$) – written in English or German, and prepared in form as the ones already appeared – to the editor-in-chief

IMRE KÁTAI

Department of Computer Algebra, Eötvös Loránd University,
H-1117, Budapest, Bogdánfy u. 10/b.
