| <i>Schipp F.</i> : János Balázs | 3 |
| List of publications of János Balázs | 9 |
| <i>Baron S. and Schipp F.</i> : Identical classes of multipliers for Walsh series ... | 13 |
| <i>Bassily N.L.</i> : Inequalities for stopped random walks | 31 |
| <i>Bui Minh Phong</i> : Characterizations of the logarithm as an additive function | 45 |
| <i>Chen W. and Sharma A.</i> : Lacunary interpolation on some non- uniformly distributed nodes on the unit circle | 69 |
| <i>Csörgő I.</i> : A representation theorem for the operator space $L(L_0^\infty(X); Z)$. | 83 |
| <i>Della Vecchia B., Mastroianni G. and Szabados J.</i> : Balázs-Shepard operators on infinite intervals | 93 |
| <i>Farzan R.H.</i> : Integral equation method for Maxwell equations | 103 |
| <i>Fawzy Th., Holail F.S. and El-Ganayni W.A.</i> : Convergence of the spline solving the $(0, m)$ lacunary interpolation problem | 129 |
| <i>Fridli S.</i> : Integrability and L^1 -convergence of trigonometric and Walsh series | 149 |
| <i>Gát Gy.</i> : Pointwise convergence of the Cesàro means of double Walsh series | 173 |
| <i>Gróf J.</i> : Approximation durch Linearkombinationen von modifizierten Szász-Operatoren | 185 |
| <i>Györfvári J.</i> : Lakunäre Interpolation mit Spline-Funktionen II. Die Fälle $(0; 2; 3)$ mit Funktionswerte in Grundpunkte | 197 |
| <i>Háy B., Pasquini L. and Vértesi P.</i> : A remark on ρ -normal matrices ... | 207 |
| <i>Joó I. and Nguyen Xuan Ky</i> : On approximation by Riesz means | 217 |
| <i>Kátai I.</i> : Research problems in number theory II. | 223 |
| <i>Kilgore Th. and Prestin J.</i> : Pointwise Gopengauz estimates for interpo- lation | 253 |

| | |
|---|-----|
| <i>Lénárd M.</i> : On a modified bi-quadratic spline function of Hermite-type .. | 263 |
| <i>Mihálykó Cs.</i> : A special spline approximation for the solution of a Cauchy problem | 273 |
| <i>Nguyen Xuan Ky</i> : A_p -weights in mechanics | 283 |
| <i>Pál L.G.</i> : A general lacunary $(0; 0, 1)$ interpolation process | 291 |
| <i>Rahman N.A.A.</i> : Approximation of functions of two variables with modi- fied spline functions of type $(0, 2)$ | 303 |
| <i>Simon L.</i> : On perturbations of initial-boundary value problems for non- linear parabolic equations | 319 |
| <i>Simon P.</i> : Remarks on Vilenkin bases | 343 |
| <i>Sövegjártó A.</i> : Spline approximations to solutions of initial value prob- lems | 359 |
| <i>Szili L.</i> : A survey on $(0, 2)$ interpolation | 377 |
| <i>Weisz F.</i> : Strong summability of two-dimensional trigonometric-Fourier series | 391 |

**ANNALES UNIVERSITATIS SCIENTIARUM
BUDAPESTINENSIS
DE ROLANDO EÖTVÖS NOMINATAE
SECTIO COMPUTATORICA**

Publication. Yearly 1 issue (about 250 pages) is scheduled to appear, which is available from the Department of Computer Algebra of the Eötvös Loránd University, Budapest, Múzeum krt. 6-8.

Editorial policy. This journal publishes research and, in special cases, survey papers treating problems from a broad field of applied mathematics written with mathematical precision, giving priorities to articles connected with the activities and interests within the departments of applied mathematics of the Eötvös University. The areas of main interest are: classical numerical analysis, modern theories of algorithms of approximation, their optimization both in deterministic and stochastic cases, summation of series, modelling and simulation, mathematical system theory, estimations of computational complexity, theory of automata, languages and system programming. Reviews of new books, both from and outside Hungary, will be also published.

Instructions for authors. Manuscripts should be submitted in two exemplars or on magnetic discs (using text preparation programs as TEX, LATEX) - written in English, German or French and prepared in form as the ones already appeared - to the editor-in-chief
