<i>Kőműves J., Csink L., Cseresznye Zs., Kőrösi L. and Puskely M.</i> : An OCR program applying classical methods and neural networks	269
<i>Männistö T., Systä T. and Tuomi J.</i> : Synthesizing OMT state diagrams	277
<i>Nikovits T., Kiss A. and Chretien D.</i> : Representation and query languages of fuzzy relational databases	293
<i>Paakki J., Gyimóthy T. and Horváth T.</i> : Independent and-parallelization of logic programs using static slicing	307
<i>Pástor-Varga K.</i> : Theorem proving method and the computer science	321
<i>Pöial J.</i> : Remarks on language extensibility	331
<i>Schrettner L., Gyimóthy T., Alexin Z. and Toczki J.</i> : Parallel execution of object functional queries	339
<i>Szarapka L., Budimac Z. and Ivanović M.</i> : Type checking and problem of overloaded arguments	355
<i>Toczki J. and Schrettner L.</i> : Attribute grammar applications	367
<i>Tombak M. and Sillitoe I.</i> : On the superposition of Boolean functions	381
<i>Tuovinen A.-P.</i> : Using compiler techniques to convert an SQL application for a new DBMS	391
<i>Vámosy Z., Csink L., Schröder J., Okulan N., Katzer I., Molnár F. and Szabó E.</i> : Recognition based object classifying system in robot environment	405

**ANNALES UNIVERSITATIS SCIENTIARUM
BUDAPESTINENSIS
DE ROLANDO EÖTVÖS NOMINATAE
SECTIO COMPUTATORICA**

Publication. Yearly 1 issue (about 250 pages) is scheduled to appear, which is available from the Department of Computer Algebra of the Eötvös Loránd University, Budapest, XI. Pázmány Péter sét. 1/D.

Editorial policy. This journal publishes research and, in special cases, survey papers treating problems from a broad field of applied mathematics written with mathematical precision, giving priorities to articles connected with the activities and interests within the departments of applied mathematics of the Eötvös University. The areas of main interest are: classical numerical analysis, modern theories of algorithms of approximation, their optimization both in deterministic and stochastic cases, summation of series, modelling and simulation, mathematical system theory, estimations of computational complexity, theory of automata, languages and system programming. Reviews of new books, both from and outside Hungary, will be also published.

Instructions for authors. Manuscripts should be submitted in two exemplars or on magnetic discs (using text preparation programs TEX) - written in English, German or French and prepared in form as the ones already appeared - to the editor-in-chief
