

**INDEX**

<i>Káta</i> I.: Imre Környei .....	3
List of publications of Imre Környei .....	5
<i>Káta</i> I.: Béla Kovács .....	7
List of publications of Béla Kovács .....	9
<i>Almási B.</i> : A queueing model for a non-homogeneous polling system subject to breakdowns .....	11
<i>Bassily N.L., Ishak S. and Káta</i> I.: On additive functions with respect to the expansion of real numbers into generalized number systems .....	25
<i>Bui Minh Phong</i> : Reduced residue systems and a problem for multiplicative functions .....	35
<i>Farkas G.</i> : Number systems in real quadratic fields .....	47
<i>Gaál I.</i> : Power integer bases in algebraic number fields .....	61
<i>Galambos J.</i> : Approximation of real numbers by rationals via series expansions .....	89
<i>Indlekofer K.-H. and Timofeev N.M.</i> : Almost-periodic multiplicative functions on the set of shifted primes .....	95
<i>Káta</i> I.: Construction of number systems in algebraic number fields .....	103
<i>Kiss P. and Liptai K.</i> : Solution of diophantine equations by second order linear recurrences .....	109
<i>Kovács A.</i> , Sets of complex numbers generated from a polynomial functional equation .....	115
<i>Kovács M.</i> : On the convexity of fuzzified functions .....	125
<i>Lakatos L.</i> : On the $M^X/G/1$ system .....	137
<i>Mauc</i> laire J.-L.: On the distribution of the values of an additive arithmetical function with values in a locally compact abelian group II. ....	151
<i>Mauc</i> laire J.-L.: A characterization of some additive arithmetical functions II. ....	161

<i>Pethő A.:</i> On the periodic expansion of algebraic numbers .....	167
<i>Stepanauskas G.:</i> The mean values of multiplicative functions I. ....	175
<i>Zay B.:</i> A connection between a class of iterative recurrence relations and some word sequences .....	187

ANNALES UNIVERSITATIS SCIENTIARUM  
BUDAPESTINENSIS  
DE ROLANDO EÖTVÖS NOMINATAE  
SECTIO COMPUTATORICA

**Publication.** Yearly 1 issue (about 250 pages) is scheduled to appear, which is available from the Department of Computer Algebra of the Eötvös Loránd University, Budapest, XI. Pázmány Péter sét. 1/D.

**Editorial policy.** This journal publishes research and, in special cases, survey papers treating problems from a broad field of applied mathematics written with mathematical precision, giving priorities to articles connected with the activities and interests within the departments of applied mathematics of the Eötvös University. The areas of main interest are: classical numerical analysis, modern theories of algorithms of approximation, their optimization both in deterministic and stochastic cases, summation of series, modelling and simulation, mathematical system theory, estimations of computational complexity, theory of automata, languages and system programming. Reviews of new books, both from and outside Hungary, will be also published.

**Instructions for authors.** Manuscripts should be submitted in two exemplars or on magnetic discs (using text preparation programs TEX) - written in English, German or French and prepared in form as the ones already appeared - to the editor-in-chief

IMRE KÁTAI

Department of Computer Algebra, Eötvös Loránd University  
H-1518 Budapest, P.O.B. 32.  
Hungary
