

INDEX

<i>Rafat Riad</i> : Double block-pulse series solution of second order partial differential equations	3
<i>Vizvári B.</i> : On pleasant but not completely pleasant knapsack problems	17
<i>Haroten H.A.</i> : Nonnegativity of the numerical solution of parabolic problems with different boundary conditions	27
<i>Haroten H.A.</i> : Nonnegativity of the numerical solution of one-dimensional heat-conduction equation with variable coefficient	41
<i>Doha E.H.</i> : The coefficients of differentiated expansions of double and triple ultraspherical polynomials	57
<i>Fóthi Á., Nyéky-Gaizler J. and Harangozó É.</i> : Abstraction strategies in practice	75
<i>Horváth R.</i> : On the positivity of iterative methods	93
<i>Strauber Gy.</i> : Approximation and stability of a mathematical model of river pollution	103
<i>Demetrovics J. and Vu Duc Thi.</i> Some computational problems related to Boyce-Codd normal form	119
<i>Yuan Jin</i> : A note on the product of consecutive elements of an arithmetic progression	133
<i>Argyros I.K.</i> : On the monotone convergence of a Chebyshev-Halley type method in partially ordered topological spaces	143
<i>Ramadan Z.</i> : On the numerical solution of a system of third order ordinary differential equations by spline functions	155
<i>Fawzy Th., Ramadan Z. and Ayad A.</i> : Error of an arbitrary order for the approximate solution of system of second order differential equations with spline functions I.	169
<i>Tran Thi Loan</i> : Lyapunov transformation and stability of differential equation in Banach spaces	187

<i>Zbăganu G.</i> : On the lattice of waiting times	199
<i>Popovici A. and Popovici D.</i> : Infix and postfix notations	211
<i>Farkas G.</i> : Investigation of a continuous cyclic-waiting problem by simulation	225
<i>Kovács A. and Bui Minh Phong</i> : On completely additive functions satisfying a congruence	237

ANNALES UNIVERSITATIS SCIENTIARUM
BUDAPESTINENSIS
DE ROLANDO EÖTVÖS NOMINATAE
SECTIO COMPUTATORICA

Publication. Yearly 1 issue (about 250 pages) is scheduled to appear, which is available from the Department of Computer Algebra of the Eötvös Loránd University, Budapest, XI. Pázmány Péter sét. 1/D.

Editorial policy. This journal publishes research and, in special cases, survey papers treating problems from a broad field of applied mathematics written with mathematical precision, giving priorities to articles connected with the activities and interests within the departments of applied mathematics of the Eötvös University. The areas of main interest are: classical numerical analysis, modern theories of algorithms of approximation, their optimization both in deterministic and stochastic cases, summation of series, modelling and simulation, mathematical system theory, estimations of computational complexity, theory of automata, languages and system programming. Reviews of new books, both from and outside Hungary, will be also published.

Instructions for authors. Manuscripts should be submitted in two exemplars or on magnetic discs (using text preparation programs TEX) - written in English, German or French and prepared in form as the ones already appeared - to the editor-in-chief
