

TOMUS XXIII.

<i>Indlekofer K.-H. and Timofeev N.M.:</i> Multiplicative functions close to the divisor function on shifted primes	3
<i>Gonda J.:</i> The structure of the Boolean-Zhegalkin transform	25
<i>Leindler L.:</i> On the absolute Cesàro summability	41
<i>Ivić A.:</i> A mean value result involving the fourth moment of $ \zeta(\frac{1}{2} + it) $	47
<i>Páles Zs. and Székelyhidi L.:</i> On approximate sandwich and decomposition theorems	59
<i>Dmitriev V.I. and Farzan R.:</i> Development of the methods of computer modelling for the electro-magnetic sounding in stratified media	71
<i>Galambos J. and Simonelli I.:</i> Distribution of multiplicative functions: The symmetric case	83
<i>Subbarao M.V.:</i> Remarks on prime-independent multiplicative functions	95
<i>Belozorov G. and Varbanets P.:</i> Diophantine equations with quadratic forms	107
<i>Kovács A. and Farkas G.:</i> Canonical expansions of integers in real quadratic fields	123
<i>Hegedűs G., Nagy A. and Rónyai L.,</i> Gröbner bases for permutations and oriented trees	137
<i>DeKoninck J.-M.:</i> Computational results and queries in number theory	149
<i>László I., Pröhle T., Fekete I. and Csornai G.:</i> A method for classifying satellite images using segments	163
<i>Licskó I.:</i> Construction of highly nonlinear functions	179
<i>Novitzká V. and Novitzky B.:</i> Metamathematical fundamental concepts of computer programming	193
<i>Roszik J.:</i> Homogeneous finite-source retrial queues with server and sources subject to breakdowns and repairs	213
<i>Mykhalevych K.V.:</i> A comparison of a classical retrial $M/G/1$ queueing system and a Lakatos-type $M/G/1$ cyclic-waiting time queueing system	229
<i>Kovács M. and Nándori E.:</i> Pessimistic and optimistic interval solutions of perturbed linear systems	239
