Kátai I.: M.V. Subbarao 1921-2006 3

List of publications of M.V. Subbarao 5

Gonda J.: Some properties of polynomial-like Boolean functions 17

Varbanets P.D.: On the number of primitive integer points on elliptic cones in arithmetic progression 25

Kátai I. and Subbarao M.V.: A remark on the product partition of integers into k parts 43

Kátai I. and Subbarao M.V.: Some further remarks on the iterates of the φ and the σ-functions 51

Indlekofer K.-H. and Bui Minh Phong: Additive uniqueness sets for multiplicative functions 65

Nguyen Hoang Son: Investigations on antikeys and minimal keys of relation schemes by hypergraphs 79

Gonda J.: Polynomial-like Boolean functions and the maximal closed classes 91

Bodó B.: On the choice-revealed extension operators 105

Goginava U.: The maximal operator of the (C, α) means of the Walsh-Fourier series 127

Kátai I. and Subbarao M.V.: Distribution of 2-additive functions under some conditions 137

Hajba T.: Optimization methods modeled by second order differential equation 145

Balázsfalvi G. and Sztrik J.: Bittorrent file sharing in mobile ad-hoc networks 159

Lischke G.: Some uncountable hierarchies of formal languages 171

Csajbók T., Farkas G., Járai A., Járai Z. and Kasza J., Report on the largest known Sophie Germain and twin primes 181

ANNALES UNIVERSITATIS SCIENTIARUM BUDAPESTINENSIS DE ROLANDO EÖTVÖS NOMINATAE SECTIO COMPUTATORICA

Publication. Yearly 2 issues are scheduled to appear, which are available from the Department of Computer Algebra of the Eötvös Loránd University, Budapest, XI. Pázmány Péter sét. 1/C.

Editorial policy. This journal publishes research and, in special cases, survey papers treating problems from a broad field of applied mathematics written with mathematical precision, giving priorities to articles connected with the activities and interests within the departments of applied mathematics of the Eötvös University. The areas of main interest are: classical numerical analysis, modern theories of algorithms of approximation, their optimization both in deterministic and stochastic cases, summation of series, modelling and simulation, mathematical system theory, estimations of computational complexity, theory of automata, languages and system programming. Reviews of new books, both from and outside Hungary, will be also published.

Instructions for authors. Manuscripts should be submitted in two exemplars and possibly (parallelly) on magnetic discs (using text preparation programs TEX) - written in English, German or French and prepared in form as the ones already appeared - to the editor-in-chief
