

INDEX OF VOLUME 28

<i>Járai A.</i> : Laudatio to Professor Imre Kátai	5
List of publications of Imre Kátai	15
<i>Allouche J.-P. and Sondow J.</i> : Infinite products with strongly B -multiplicative exponents	35
<i>Barat G. and Grabner P.J.</i> : Limit distribution of Q -additive functions from an ergodic point of view	55
<i>Bodó B. and Kovács M.</i> : On the stability of the R -rational choice function	79
<i>Bui Minh Phong</i> : On some pairs of multiplicative functions with small increments	97
<i>Buldygin V.V., Indlekofer K.-H., Klesov O.I. and Steinebach J.</i> : Asymptotics of renewal processes: Some recent developments	107
<i>Burcsi P., Kovács A. and Papp-Varga Zs.</i> : Decision and classification algorithms for generalized number systems	141
<i>Csajbók T., Járai A. and Kasza J.</i> : On representing integers as quotients of shifted primes	157
<i>Daróczy Z.</i> : On a family of functional equations with one parameter	175
<i>Dávid Á., Kozma L. and Pozsgai T.</i> : On the model checking of a system consisting of many similar components	183
<i>DeKoninck J.-M., Doyon N. and Letendre P.</i> : On the distribution of the number of digits needed to write the factorization of an integer ..	197
<i>Demetrovics J., Molnár A. and Thalheim B.</i> : Graphs representing sets of functional dependencies	213
<i>Farkas G. and Fülöp Á.</i> : The sandbox method in quadratic fields	235
<i>Farzan R.</i> : On properties of the singular integral operator for the Maxwell equations	249
<i>Fugelo N. and Velichko I.</i> : Average orders of divisor function of integer matrices in $M_3(\mathbb{Z})$	261

<i>Gonda J.:</i> On the problem of the choice of the radix	271
<i>Gunyav O. and Varbanets P.:</i> Exponential sum on algebraic variety $\frac{\alpha}{f_1(x,y)} + \frac{\beta}{f_2(X,Y)} = 1$	283
<i>Indlekofer K.-H.:</i> Identities in the convolution arithmetic on number theoretical functions	303

INDEX OF VOLUME 29

<i>Ivić A.</i> : On the Riemann zeta-function and the divisor problem III.	3
<i>Kačinskaitė R. and Laurinćikas A.</i> : A discrete limit theorem on the complex plane for the Hurwitz zeta-function with an algebraic irrational parameter	25
<i>Kamiya Y. and Murata L.</i> : On the average of some q -additive functions ..	39
<i>Krebsz A. and Lénárd M.</i> : On weighted (0,1,3)-interpolation	65
<i>Lakatos L.</i> : A note on the Pollaczek-Khinchin formula	83
<i>Leindler L.</i> : On the degree of approximation of continuous functions	93
<i>Mauclaire J.-L.</i> : Fonctions arithmétiques additives à valeurs dans un groupe discret	101
<i>Nagy G.</i> : On two games in the real line	115
<i>Nikodem K. and Páles Zs.</i> : Note on t -quasi-affine functions	127
<i>Orosz Á. and Székelyhidi L.</i> : Moment functions on Sturm-Liouville hypergroups	141
<i>Pap M. and Schipp F.</i> : The voice transform on the Blaschke group II. ...	157
<i>Pintér D. and Rónyai L.</i> , On the Hilbert function of copplementary set families	175
<i>Šiaulyš J. and Stepanauskas G.</i> : Poisson distribution for a sum of additive functions on arithmetic progressions	199
<i>Smati A.</i> : Sur un problème d'Erdős et Kátai	213
<i>Szabó S.</i> : Groups admitting only quasi-periodic factorizations	239
<i>Szili L.</i> : Uniform weighted convergence of Grünwald interpolation process on the roots of Jacobi polynomials	245
<i>Tóth L.</i> : Regular integers modulo n	263
<i>Varbanets S.</i> : On inversive congruential generator for pseudorandom numbers with prime power modulus	277
<i>Weisz F.</i> : Strong Marcinkiewicz summability of multi-dimensional Fourier series	297

**ANNALES UNIVERSITATIS SCIENTIARUM
BUDAPESTINENSIS
DE ROLANDO EÖTVÖS NOMINATAE
SECTIO COMPUTATORICA**

Publication. Yearly 2 issues are scheduled to appear, which are available from the Department of Computer Algebra of the Eötvös Loránd University, Budapest, XI. Pázmány Péter sét. 1/C.

Editorial policy. This journal publishes research and, in special cases, survey papers treating problems from a broad field of applied mathematics written with mathematical precision, giving priorities to articles connected with the activities and interests within the departments of applied mathematics of the Eötvös University. The areas of main interest are: classical numerical analysis, modern theories of algorithms of approximation, their optimization both in deterministic and stochastic cases, summation of series, modelling and simulation, mathematical system theory, estimations of computational complexity, theory of automata, languages and system programming. Reviews of new books, both from and outside Hungary, will be also published.

Instructions for authors. Manuscripts should be submitted in two exemplars and possibly (parallelly) on magnetic discs (using text preparation programs TEX) - written in English, German or French and prepared in form as the ones already appeared - to the editor-in-chief
