

## INDEX

<i>László T. and Kiss Á.:</i> Obfuscating C++ programs via control flow flattening .....	3
<i>Pócza K., Biczó M. and Porkoláb Z.:</i> Towards detailed trace generation using the profiler in the .NET Framework .....	21
<i>Biczó M., Pócza K. and Porkoláb Z.:</i> Runtime access control in C# 3.0 using extension methods .....	41
<i>Pintér G., Micskei Z. and Majzik I.:</i> Supporting design and development of safety critical applications by model based tools .....	61
<i>Nagy Cs., Lóki G., Beszédes Á. and Gyimóthy T.:</i> Code factoring in GCC on different intermediate languages .....	79
<i>Porkoláb Z., Mihalicza J., Pataki N. and Sipos Á.:</i> Analysis of profiling techniques for C++ template metaprograms .....	97
<i>Balogh Á. and Csörnyei Z.:</i> Subject-oriented operating system development based on system predicate classes .....	117
<i>Vojdani V. and Vene V.:</i> Goblint: Path-sensitive data race analysis .....	141
<i>László I., Dezső B., Fekete I. and Pröhle T.:</i> A fully segment/based method for the classification of satellite images .....	157
<i>Istenes Z. and Kozsik T.,</i> Commanding a robot in a safe way .....	175
<i>Hartikainen V.-M., Vulli M. and Järvinen H.-M.:</i> Node-based architecture for lightweight middleware .....	191
<i>Diviánszky P.:</i> Efficient implementation of linearly used finite maps .....	201

ANNALES UNIVERSITATIS SCIENTIARUM  
BUDAPESTINENSIS  
DE ROLANDO EÖTVÖS NOMINATAE  
SECTIO COMPUTATORICA

**Publication.** Yearly 2 issues are scheduled to appear, which are available from the Department of Computer Algebra of the Eötvös Loránd University, Budapest, XI. Pázmány Péter sét. 1/C.

**Editorial policy.** This journal publishes research and, in special cases, survey papers treating problems from a broad field of applied mathematics written with mathematical precision, giving priorities to articles connected with the activities and interests within the departments of applied mathematics of the Eötvös University. The areas of main interest are: classical numerical analysis, modern theories of algorithms of approximation, their optimization both in deterministic and stochastic cases, summation of series, modelling and simulation, mathematical system theory, estimations of computational complexity, theory of automata, languages and system programming. Reviews of new books, both from and outside Hungary, will be also published.

**Instructions for authors.** Manuscripts should be submitted in two exemplars and possibly (parallelly) on magnetic discs (using text preparation programs TEX) - written in English, German or French and prepared in form as the ones already appeared - to the editor-in-chief

IMRE KÁTAI
