

**INDEX**

<i>Stoyan G.</i> : Obituary on Aleksandr Andrejevich Samarskij 1919-2008 .....	3
<i>DeKoninck J.-M. and Luca F.</i> : On sums of powers of prime factors of an integer .....	13
<i>Kruglov V.E.</i> : Solution of the linear differential equation of $n$ -th order with four singular points .....	23
<i>Polgár R.</i> : A generalized bilinear spline approximation .....	37
<i>Gonda J.</i> : Conjunctively polynomial-like Boolean functions and the maximal closed classes .....	49
<i>Kátai I.</i> : On sets characterized by the values of some multiplicative functions .....	63
<i>Sitaramaiah V. and Subbarao M.V.</i> : Unitary divisor problem for arithmetic progressions .....	73
<i>Robbins N.</i> : A simply-obtained upper bound for overpartitions .....	91
<i>Kátai I.</i> : Some remarks on the average order in cyclic groups .....	95
<i>Polgár R.</i> , A generalized spline approximation .....	103
<i>Kátai I.</i> : Some remarks on a paper written by J.-M. Deshouillers and F. Luca .....	123
<i>Krem A.</i> : Primality testing using generalized Fibonacci sequences .....	129
<i>Pétermann Y.-F.S.</i> : Arithmetical functions involving exponential divisors: note on two papers by L. Tóth .....	143
<i>Varbanets P. and Varbanets S.</i> : On inversive congruential generator with a variable shift for pseudorandom numbers with prime power modulus .....	151
<i>Nagy G.</i> : Remarks on the number systems of the Gaussian integers .....	177
<i>Gonda J.</i> : Three remarks on the conjunctively polynomial-like Boolean functions .....	189
<i>Sztrik J. and Kim C.S.</i> : Tool supported performability investigations of heterogeneous finite-source retrieval queues .....	201

<i>Kátai I.</i> : Some remarks on a result of F. Luca and I. Shparlinski .....	221
<i>Vo Viet Minh Nhat and Le Manh Thanh</i> : Clustering-learning model for reducing the delay in traffic grooming optimization .....	231
<i>Bui Minh Phong</i> : A characterization of the identity function with functional equation .....	247
<i>Errata for the paper J.-P. Allouche and J. Sondow</i> : Infinite products with strongly $B$ -multiplicative exponents .....	253

ANNALES UNIVERSITATIS SCIENTIARUM  
BUDAPESTINENSIS  
DE ROLANDO EÖTVÖS NOMINATAE  
SECTIO COMPUTATORICA

**Publication.** Yearly 2 issues are scheduled to appear, which are available from the Department of Computer Algebra of the Eötvös Loránd University, Budapest, XI. Pázmány Péter sét. 1/C.

**Editorial policy.** This journal publishes research and, in special cases, survey papers treating problems from a broad field of applied mathematics and computer science written with mathematical precision, giving priorities to articles connected with the activities and interests within the departments of applied mathematics and computer science of the Eötvös University. The areas of main interest are: classical numerical analysis, modern theories of algorithms of approximation, their optimization both in deterministic and stochastic cases, summation of series, modelling and simulation, mathematical system theory, estimations of computational complexity, theory of automata, languages and system programming. Reviews of new books, both from and outside Hungary, will be also published.

**Instructions for authors.** Manuscripts should be submitted in two exemplars or in electronic form (the TEX and PDF files) - written in English, German or French and prepared in form as the ones already appeared - to the editor-in-chief
