

INDEX OF VOLUME 34

<i>Simonelli, I.</i> : Laudation to Professor Janos Galambos	5
List of publication of Janos Galambos	15
<i>Antal, L. and T.F. Móri</i> : How large can the coefficients of a power series be?	25
<i>Bassily, N.L. and I. Kátai</i> : Some further remarks on a paper of K. Ramachandra	33
<i>Bui Minh Phong</i> : On the pairs of multiplicative functions with a special relation	45
<i>Castillo, E.</i> : Some joint work with Janos Galambos	67
<i>Daróczy, Z. and J. Dascăl</i> : On conjugate means of n variables	87
<i>De Koninck, J.-M., N. Doyon and I. Kátai</i> : Arithmetic functions evaluated at polynomial values	95
<i>Germán, L., K.-H. Indlekofer and O. Klesov</i> : On quantitative mean value estimations for multiplicative functions	115
<i>Indlekofer, K.-H.</i> : Tauberian theorems with applications to arithmetical semigroups and probabilistic combinatorics	135
<i>Indlekofer K.-H., I. Kátai and O. Klesov</i> : Renewal theorems for some weighted renewal functions	179
<i>Min-Young Lee and Young Ik Kim</i> : On characterizations of Pareto distribution by hazard rate of record value	195
<i>Nyandwi, S.</i> : Répartition sur les entiers friables des valeurs de fonctions arithmétiques liées aux fonctions de Piltz	201
<i>Schipp, F. and A. Soumelidis</i> : On the Fourier coefficients with respect to the discrete Laguerre system	223
<i>Simonelli, I.</i> : On the uniqueness of solutions to relations based on products and mixed sums of random variables	235
<i>Wang, Bao-Wei and Jun Wu</i> : On the maximal run-length function in continued fractions	247

ANNALES UNIVERSITATIS SCIENTIARUM
BUDAPESTINENSIS
DE ROLANDO EÖTVÖS NOMINATAE
SECTIO COMPUTATORICA

Publication. Yearly 2 issues are scheduled to appear, which are available from the Department of Computer Algebra of the Eötvös Loránd University, Budapest, XI. Pázmány Péter sét. 1/C.

Editorial policy. This journal publishes research and, in special cases, survey papers treating problems from a broad field of applied mathematics and computer science written with mathematical precision, giving priorities to articles connected with the activities and interests within the departments of applied mathematics and computer science of the Eötvös University. The areas of main interest are: classical numerical analysis, modern theories of algorithms of approximation, their optimization both in deterministic and stochastic cases, summation of series, modelling and simulation, mathematical system theory, estimations of computational complexity, theory of automata, languages and system programming. Reviews of new books, both from and outside Hungary, will be also published.

Instructions for authors. Manuscripts should be submitted in two exemplars or in electronic form (the TEX and PDF files) - written in English, German or French and prepared in form as the ones already appeared - to the editor-in-chief
