

## INDEX OF VOLUME 35

<i>Aczél, J. and Che Tat Ng</i> : Results on classes of functional equations. Tribute to Antal Járαι .....	5
<i>Daróczy, Z.</i> : Antal Járαι has turned 60 .....	11
List of publications of Antal Járαι .....	13
<i>Bassily, N.L. and I. Kátai</i> : On the theorem of H. Daboussi over the Gaussian integers .....	25
<i>Bui Minh Phong</i> : On multiplicative functions with shifted arguments .....	35
<i>Burcsi, P., S. Czirbusz and G. Farkas</i> : Computational investigation of Lehmer's Totient Problem .....	43
<i>Chrípkó, Á.</i> : On the weighted Lebesgue function of Fourier–Jacobi series .....	51
<i>Csajbók, T. and J. Kasza</i> : Iterating the tau-function .....	83
<i>Fridli, S. and F. Schipp</i> : Biorthogonal systems to rational functions .....	95
<i>Ger, R. and Z. Kominek</i> : An interplay between Jensen's and Pexider's functional equations on semigroups .....	107
<i>Germán, L.</i> : Mean values of multiplicative functions on the set of $\mathcal{P}_k + 1$ , where $\mathcal{P}_k$ runs over the integers having $k$ distinct prime factors .....	125
<i>Gselmann, E. and Gy. Maksa</i> : A characterization of the relative entropies .....	151
<i>Kátai, I.</i> : Some remarks on the Carmichael and on the Euler's $\varphi$ function .....	163
<i>Matkowskí, J.</i> : Functional equations related to homographic functions .....	189

---

<i>Minculete, N. and L. Tóth:</i> Exponential unitary divisors .....	205
<i>Molnár, L.:</i> Continuous maps on matrices transforming geometric mean to arithmetic mean .....	217
<i>Nagy, G.:</i> On the simultaneous number systems of Gaussian integers .....	223
<i>Sander, W.:</i> Symmetric deviations and distance measures .....	239
<i>Simon, P.:</i> A note on dyadic Hardy spaces .....	255
<i>Székeleyhidi, L.:</i> Fourier transform for mean periodic functions .....	267
<i>Szili, L.:</i> On Fejér type summability of weighted Lagrange interpolation on the Laguerre roots .....	285
<i>Weisz, F.:</i> Restricted summability of multi-dimensional Vilenkin–Fourier series .....	305

ANNALES UNIVERSITATIS SCIENTIARUM  
BUDAPESTINENSIS  
DE ROLANDO EÖTVÖS NOMINATAE  
SECTIO COMPUTATORICA

**Publication.** Yearly 2 issues are scheduled to appear, which are available from the Department of Computer Algebra of the Eötvös Loránd University, Budapest, XI. Pázmány Péter sét. 1/C.

**Editorial policy.** This journal publishes research and, in special cases, survey papers treating problems from a broad field of applied mathematics and computer science written with mathematical precision, giving priorities to articles connected with the activities and interests within the departments of applied mathematics and computer science of the Eötvös University. The areas of main interest are: classical numerical analysis, modern theories of algorithms of approximation, their optimization both in deterministic and stochastic cases, summation of series, modelling and simulation, mathematical system theory, estimations of computational complexity, theory of automata, languages and system programming. Reviews of new books, both from and outside Hungary, will be also published.

**Instructions for authors.** Manuscripts should be submitted in two exemplars or in electronic form (the TEX and PDF files) - written in English, German or French and prepared in form as the ones already appeared - to the editor-in-chief
