

INDEX

*Kátai, I.*: Laudation to Dr. Bui Minh Phong on his 60th anniversary ..... 5

List of publications of Bui Minh Phong ..... 13

*Chakraborty, K. and Mehta, J.*: On completely multiplicative complex valued functions ..... 19

*Trinh Tuan.*: A novel polyconvolution for the Fourier sine, Fourier cosine and the Kontorovich-Lebedev integral transforms and applications ... 25

*Indlekofer, K.-H. and Kátai, I.*: Some remarks on Beurling type integers generated by the set of shifted primes ..... 43

*DeKoninck, J.-M. and Kátai, I.*: The distribution of additive functions in short intervals on the set of shifted primes having a fixed number of prime factors ..... 57

*Ha Huy Khoai, Vu Hoai An and Nguyen Xuan Lai.*: Value sharing problem and uniqueness for  $p$ -adic meromorphic functions and their derivatives ..... 71

*Szili, L. and Tóth, J.*: Partial fraction decomposition of some meromorphic functions ..... 93

*Lakatos, L.*: The generating function of ergodic distribution in the M/G/1 system with vacation at the beginning of the busy period ... 109

*Csajbók, T., Farkas, G. and Kasza, J.*: Sieving for large twin primes and Cunningham chains of length 2 of the second kind ..... 117

*Germán, L. and Kátai, I.*: Distribution of the values of  $q$ -additive functions on some multiplicative semigroups ..... 129

*Germán, L. and Kátai, I.*: Distribution of the values of  $q$ -additive functions on some multiplicative semigroups II., ..... 147

*Indlekofer, K.-H. and Kaya, E.*: The three-series theorem in additive arithmetical semigroups ..... 161

*Sitaramaiah, V. and Rajmohan, G.*: Rearick's isomorphism and a characterization of  $\psi$ -additive functions ..... 183

<i>Slyoka-Tylyshchak, A.:</i> Justification of the Fourier method for equations of homogeneous string vibration with random initial conditions . . . . .	211
<i>Ivić, A. and Wenguang Zhai:</i> A mean value result for the fourth moment of $ \zeta(\frac{1}{2} + it) $ II. . . . .	233
<i>Kátai, I.:</i> On the prime divisors of the Euler Phi and the sum of divisors functions . . . . .	245
<i>Chakraborty, K., Kátai, I. and Bui Minh Phong:</i> On additive functions satisfying some relations . . . . .	257
<i>Chakraborty, K., Kátai, I. and Bui Minh Phong:</i> On the values of arithmetic functions in short intervals . . . . .	269
<i>Krasniqi, Xh.Z.:</i> Some further results on the degree of approximation of continuous functions . . . . .	279
<i>Indlekofer, K.-H., Kátai, I. and Klesov, O.I.:</i> On random arithmetical functions II. . . . .	295
<i>Barát, A., Indlekofer, K.-H. and Kaya, E.:</i> Two-series theorem in additive arithmetical semigroups . . . . .	309
Correction to volume 26 . . . . .	319

ANNALES UNIVERSITATIS SCIENTIARUM  
BUDAPESTINENSIS  
DE ROLANDO EÖTVÖS NOMINATAE  
SECTIO COMPUTATORICA

**Publication.** Yearly 2 issues are scheduled to appear, which are available from the Department of Computer Algebra of the Eötvös Loránd University, Budapest, XI. Pázmány Péter sét. 1/C.

**Editorial policy.** This journal publishes research and, in special cases, survey papers treating problems from a broad field of applied mathematics and computer science written with mathematical precision, giving priorities to articles connected with the activities and interests within the departments of applied mathematics and computer science of the Eötvös University. The areas of main interest are: classical numerical analysis, modern theories of algorithms of approximation, their optimization both in deterministic and stochastic cases, summation of series, modelling and simulation, mathematical system theory, estimations of computational complexity, theory of automata, languages and system programming. Reviews of new books, both from and outside Hungary, will be also published.

**Instructions for authors.** Manuscripts should be submitted in two exemplars or in electronic form (the TEX and PDF files) - written in English, German or French and prepared in form as the ones already appeared - to the editor-in-chief
