

INDEX OF VOLUME 39

<i>Kátai, I.</i> : Laudation to Professor Karl-Heinz Indlekofer on his seventieth anniversary	7
List of publications II. of Karl-Heinz Indlekofer	13
<i>Barát, A. and E. Kaya</i> : On the models of Indlekofer and Kubilius in probabilistic number theory	17
<i>Bareikis, G. and A. Mačiulis</i> : On the number of divisors in arithmetical semigroups	35
<i>De Koninck, J.-M. and I. Kátai</i> : Using large prime divisors to construct normal numbers	45
<i>Fridli, S., Z. Gilián and F. Schipp</i> : Rational biorthogonal systems on the plane	63
<i>Gát, Gy.</i> : Almost everywhere convergence of sequences of two-dimensional Vilenkin–Fejér means of integrable functions	79
<i>Gut, A. and J. Steinebach</i> : Convergence rates in precise asymptotics II	95
<i>Hampejs, M. and L. Tóth</i> : On the subgroups of finite Abelian groups of rank three	111
<i>Harutyunyan, A. and W. Lusky</i> : A remark on the isomorphic classification of weighted spaces of holomorphic functions on the upper half plane	125
<i>Iliencko, A.</i> : Continuous counterparts of Poisson and binomial distributions and their properties	137
<i>Indlekofer, K.M. and J.M. Castelo Area</i> : On the correlation entropy of discrete nanoelectronic systems	149
<i>Indlekofer, T.</i> : Signature rollback with extreme compaction – A technique for testing robust VLSI circuits with reduced hardware overhead	161
<i>Iványi, A. and Z. Kása</i> : Prism complexity of matrices	181
<i>Janulis, K. and A. Laurinćikas</i> : Joint universality of Dirichlet L -functions and Hurwitz zeta-functions	203

<i>Jäger-Ambrożewicz, M.</i> : Closed form solutions of measures of systemic risk	215
<i>Kargina, T. and E. Manstavičius</i> : The law of large numbers with respect to ewens probability	227
<i>Kátai, I.</i> : Some remarks on a result of Timofeev and Khripunova ...	239
<i>Kaya, E., M. Kucukaslan and R. Wagner</i> : On statistical convergence and statistical monotonicity	257
<i>Klesov, O.I. and U. Stadtmüller</i> : Existence of moments in the Hsu–Robbins–Erdős theorem	271
<i>Kovács, A.</i> : Algorithmic construction of simultaneous number system in the lattice of Gaussian integers	279
<i>Lajkó, K. and F. Mészáros</i> : General solution of a functional equation arisen from characterization problems	291
<i>Luh, W.</i> : Power series – the structure of H.–O.-gaps	303
<i>Mauclaire, J.-L.</i> : Universality of the Riemann zeta function: two remarks	311
<i>Oswald, N. and J. Steuding</i> : Sums of continued fractions to the nearest integer	321
<i>Pap, M.</i> : Multiresolution in the Bergman space	333
<i>Phong, B.M.</i> : On additive functions with values in Abelian groups	355
<i>Runovska, M.K.</i> : Strong law of large numbers for scalar-normed sums of elements of regressive sequences of random variables	365
<i>Simon, I.</i> : On transformations by dyadic martingale structure preserving functions	381
<i>Simon, P.</i> : On a theorem of Feichtinger and Weisz	391
<i>Stakėnas, V.</i> : On the uniformity of some sequences of rational numbers	405
<i>Stoyan, G.</i> : On a numerical model for the pianoforte	415
<i>Székelyhidi, L.</i> : Spectral synthesis problems on hypergroups	439
<i>Wagner, R.</i> : Über den Zusammenhang zwischen Funtionenalgebren von Zahlentheoretischen Funktionen und Mengenalgebren	449
<i>Wen-Bin Zhang (Chung Man Ping)</i> : Normalization of Beurling generalized primes with Riemann Hypothesis	459

ANNALES UNIVERSITATIS SCIENTIARUM
BUDAPESTINENSIS
DE ROLANDO EÖTVÖS NOMINATAE
SECTIO COMPUTATORICA

Publication. Yearly 2 issues are scheduled to appear, which are available from the Department of Computer Algebra of the Eötvös Loránd University, Budapest, XI. Pázmány Péter sét. 1/C.

Editorial policy. This journal publishes research and, in special cases, survey papers treating problems from a broad field of applied mathematics and computer science written with mathematical precision, giving priorities to articles connected with the activities and interests within the departments of applied mathematics and computer science of the Eötvös University. The areas of main interest are: classical numerical analysis, modern theories of algorithms of approximation, their optimization both in deterministic and stochastic cases, summation of series, modelling and simulation, mathematical system theory, estimations of computational complexity, theory of automata, languages and system programming. Reviews of new books, both from and outside Hungary, will be also published.

Instructions for authors. Manuscripts should be submitted in two exemplars or in electronic form (the TEX and PDF files) - written in English, German or French and prepared in form as the ones already appeared - to the editor-in-chief
