

## LIST OF PUBLICATIONS

*Zoltán Daróczy*

- [1] *Szükséges és elégséges feltételek lineáris függvényegyenletek konstanstól különböző megoldásainak létezéséhez*, (*Necessary and sufficient conditions for the existence of nonconstant solutions of functional equations*), (in Hungarian). Tudományos Diákköri dolgozatok, Tankönyvkiadó, Budapest (1960), pp. 170–185.
- [2] *Megjegyzések függvényegyenletekről*, (*Remarks on functional equations*), (in Hungarian). Deuixième Congr. Math. Hongrois, Budapest (1960), **II**, Part II/b, 70–72.
- [3] Elementare Lösung einer mehrere unbekannte Funktionen enthaltenden Funktionalgleichung. *Publ. Math. Debrecen*, **8** (1961), 160–168.
- [4] Notwendige und hinreichende Bedingungen für die Existenz von nichtkonstanten Lösungen linearer Funktionalgleichungen. *Acta Sci. Math. (Szeged)*, **22** (1961), 31–41.
- [5] Über die gemeinsame Charakterisierung der zu den nicht vollständigen Verteilungen gehörigen Entropien von Shannon und von Rényi. *Z. Wahrscheinlichkeitstheorie und Verw. Gebiete*, **1** (1962), 381–388.
- [6] Über die Funktionalgleichung  $\varphi[\varphi(x)y] = \varphi(x)\varphi(y)$ , *Acta Univ. Debrecen, Ser. Fiz. Chem.*, **8** (1962), 125–132.
- [7] Transzfinit segédeszközök a függvényegyenletek elméletében, (Transfinit tools in the theory of functional equations), (in Hungarian). *Mat. Lapok*, **13** (1962), 196–197.
- [8] *Lineáris függvényegyenletek (Linear Functional Equations)*, (*in Hungarian*). PhD Thesis, Institute of Mathematics, Lajos Kossuth University, Debrecen, Hungary, 1962.
- [9] Charakterisierung der Entropien positiver Ordnung und der Shannonschen Entropie. *Acta Math. Acad. Sci. Hungar.*, **14** (1963), 95–21. (with J. Aczél)

- 
- [10] Sur la caractérisation axiomatique des entropies d'ordre positif, y comprise l'entropie de Shannon. *C. R. Acad. Sci. Paris*, **257** (1963), 1581–1584. (with J. Aczél)
- [11] Über verallgemeinerte quasilineare Mittelwerte, die mit Gewichtsfunktionen gebildet sind. *Publ. Math. Debrecen*, **10** (1963), 171–190. (with J. Aczél)
- [12] Multiplikatív számelméleti függvények alkalmazása az információ elméletben és a statisztikus termodinamikában, (Applications of multiplicative number theoretical functions in the theory of information and statistical thermodynamics), (in Hungarian). *Mat. Lapok*, **14** (1963), 179–180 (with J. Aczél).
- [13] Einige Ungleichungen über die mit Gewichtsfunktionen gebildeten Mittelwerte. *Monatsh. Math.*, **68** (1964), 102–112.
- [14] A bilineáris függvényegyenletek egy osztályáról (On a class of bilinear functional equations), (in Hungarian). *Mat. Lapok*, **15** (1964), 52–86.
- [15] Über Mittelwerte und Entropien vollständiger Wahrscheinlichkeitsverteilungen. *Acta Math. Acad. Sci. Hungar.*, **15** (1964), 203–210.
- [16] Über eine Verallgemeinerung des Entropiebegriffs der masstreuen Abbildungen. *Publ. Math. Debrecen*, **12** (1965), 117–125.
- [17] *Különböző entrópiafogalmak axiomatikus megalapozása és alkalmazása a mértéktartó leképezések elméletében (Axiomatic Foundation of Various Notions of Entropy and its Application in the Theory of Measure Preserving Transformations)*, (in Hungarian). Cand. of Sci. Thesis, Institute of Mathematics, Lajos Kossuth University, Debrecen, Hungary, 1965.
- [18] Az  $f[x + yf(x)] = f(x)f(y)$  függvényegyenlet folytonos megoldásáról Hilbert-terekben (Continuous solutions of the functional equation  $f[x + yf(x)] = f(x)f(y)$  in Hilbert spaces), (in Hungarian). *Mat. Lapok*, **17** (1966), 339–343.
- [19] Die Cauchysche Funktionalgleichung über diskrete Mengen. *Publ. Math. Debrecen*, **13** (1966), 249–255. (with K. Györi)
- [20] Über eine Charakterisierung der Shannonschen Entropie. *Statistica (Bologna)*, **27** (1967), 199–205.
- [21] Über eine Klasse von Funktionalgleichungen im Hilbert-Raum. *Enseignement Math. (2)*, **13** (1967), 99–102.

- 
- [22] Über eine Operatorgleichung im Hilbertraum. *Publ. Math. Debrecen*, **14** (1967), 349–351.
- [23] Über die Erweiterung der auf einer Punktmenge additiven Funktionen. *Publ. Math. Debrecen*, **14** (1967), 239–245. (with L. Losonczi)
- [24] Über die Charakterisierung der Shannonschen Entropie. In: *Proc. of the Colloquium on Information Theory (Debrecen), Budapest I.*, (1967), 135–139.
- [25] Über eine Funktionalgleichung im Hilbertraum. *Publ. Inst. Math. (Beograd) (N.S.)*, **8(22)** (1968), 121–123.
- [26] A characterization of Shannon's entropy. *Boll. Un. Mat. Ital.* (4), **1** (1968), 631–635. (with B. Forte)
- [27] Sopra un sistema di equazioni funzionali nella teoria dell'informazione. *Ann. Univ. Ferrara Sez. VII (N.S.)*, **13** (1968), 67–75. (with B. Forte)
- [28] Problem 3, *Report of Meeting, Aequationes Math.*, **1** (1968), 150–151.
- [29] Über das arithmetische Gewichtsmittel. In *II. Int. Colloq. on Functional Equations*, N. M. E. Közleményei (Miskolc) **6** (1968).
- [30] Über die Funktionalgleichung  $f(xy) + f(x + y - xy) = f(x) + f(y)$ . *Publ. Math. Debrecen*, **16** (1969), 129–132.
- [31] Über ein Funktionalgleichungssystem der Informationstheorie. *Aequationes Math.*, **2(2-3)** (1969), 144–149.
- [32] Remark 1 - Problem 45, *Report of Meeting, Aequationes Math.*, **2** (1969), 371.
- [33] Funktionalgleichungen in der Informationstheorie, *Prace Mat.*, **14** (1969), 119–121.
- [34] Generalized information functions. *Information and Control*, **16** (1970), 36–51.
- [35] On the Shannon measure of information. *Magyar Tud. Akad. Mat. Fiz. Oszt. Közl.*, **19** (1970), 9–24.
- [36] Additive zahlentheoretische Funktionen und das Mass der Information. *Ann. Univ. Sci. Budapest., Eötvös Sect. Math.*, **13** (1971), 1970, 83–88. (1971), 1970. (with I. Káta)
- [37] Problem 5, In report of the Schweitzer Miklós Competition 1969, *Mat. Lapok*, **21** (1970), 150–152.

- 
- [38] Über die Erweiterung der auf einer Punktmenge additive Funktionen, *N. M. E. Közleményei (Miskolc)*, **30** (1970), 309–310 (with L. Losonczi).
- [39] Über den Vergleich von Mittelwerten. *Publ. Math. Debrecen*, **17** (1971), 1970, 289–297. (with L. Losonczi)
- [40] On the general solution of the functional equation  $f(x+y-xy)+f(xy) = f(x)+f(y)$ . *Aequationes Math.*, **6** (1971), 130–132.
- [41] A general inequality for means. *Aequationes Math.*, **7(1)** (1971), 16–21.
- [42] On the measurable solutions of a functional equation. *Acta Math. Acad. Sci. Hungar.*, **22** (1971/72), 11–14.
- [43] Über eine Klasse von Mittelwerten. *Publ. Math. Debrecen*, **19** (1972), 1973, 211–217.
- [44] Remark and Problem 90 (On Hosszú's functional equation), *Report of Meeting, Aequationes Math.*, **8** (1972), 169.
- [45] Remarks 35, *Report of Meeting, Aequationes Math.*, **8** (1972), 187–188.
- [46] On the Shannon Measure of Information, *Inst. Math. Statist. Amer. Math. Soc. Mathematical Statistics and Probability*, **10** (1972), 193–210.
- [47] *Mérték és integrál, (Measure and Integral)*, (in Hungarian). Tankönyvkiadó, Budapest, 1973.
- [48] Rearrangement inequalities. *Publ. Math. Debrecen*, **20** (1974), 1973, 273–279.
- [49] Eine Funktionalgleichung von Abel und die Grundgleichung der Information. *Period. Math. Hungar.*, **4** (1973), 25–28. (with H. Kiesewetter)
- [50] *Újabb módszerek és eredmények a függvényegyenletek és a függvényegyenlőtlenségek elméletében (Newer Methods and Results in the Theory of Functional Equations and Functional Inequalities)*, (in Hungarian). Doct. of Sci. Thesis, Institute of Mathematics, Lajos Kossuth University, Debrecen, Hungary, 1974.
- [51] *On Measures of Information and Their Characterizations*. Academic Press [Harcourt Brace Jovanovich Publishers], New York, 1975. Mathematics in Science and Engineering, Vol. 115. (with J. Aczél)
- [52] Remarks on the entropy equation. *Zbornik Rad. Mat. Inst. Beograd (N.S.)*, **1(9)** (1976), 31–34. Symposium en Quasigroupes et Équations Fonctionnelles (Belgrade-Novi Sad, 1974).

- 
- [53] Functional equations on ordered fields. *Publ. Math. Debrecen*, **24(1-2)** (1977), 173–179. (with K. Lajkó and L. Székelyhidi)
- [54] Problem 169 (On the functional equation of Kampé de Fériet and Forte), *Aequationes Math.*, **15** (1977), 298.
- [55] A mixed theory of information. I. Symmetric, recursive and measurable entropies of randomized systems of events. *RAIRO Inform. Théor.*, **12(2)** (1978), 149–155. (with J. Aczél)
- [56] On the measurable solution of a functional equation arising in information theory. *Acta Math. Acad. Sci. Hungar.*, **34(1-2)** (1979), 105–116. (with A. Járai)
- [57] Nonnegative information functions. In *Analytic function methods in probability theory (Proc. Colloq. Methods of Complex Anal. in the Theory of Probab. and Statist., Lajos Kossuth Univ. Debrecen, Debrecen, 1977)*, page 67–78. North-Holland, Amsterdam, 1979. (with Gy. Maksa)
- [58] Über die stetigen Lösungen der Aczél-Benz'schen Funktionalgleichung. *Abh. Math. Sem. Univ. Hamburg*, **50** (1980), 210–218.
- [59] On the generating function for the Appell polynomials. *Ann. Univ. Sci. Budapest. Eötvös Sect. Math.*, **24** (1981), 241–246. (with Gy. Maksa)
- [60] On comparison of mean values. *Publ. Math. Debrecen*, **29(1-2)** (1982), 107–115. (with Zs. Páles)
- [61] Multiplicative mean values and entropies. In *Functions, series, operators, Vol. I, II (Budapest, 1980)*, page 343–359. North-Holland, Amsterdam, 1983. (with Zs. Páles)
- [62] Die Aczél-Benz'sche Funktionalgleichung auf der additiven Gruppe der ganzen Zahlen. *Publ. Math. Debrecen*, **31(3-4)** (1984), 221–227. (with E. Kotora)
- [63] Problem P228, *Report of Meeting, Aequationes Math.*, **26** (1984), 274.
- [64] Interval filling sequences. *Ann. Univ. Sci. Budapest., Sect. Comp.*, **6** (1985), 53–63. (with A. Járai and I. Káta)
- [65] On additive number-theoretical functions with values in a compact Abelian group. *Aequationes Math.*, **28(3)** (1985), 288–292. (with I. Káta)
- [66] Bemerkung, *Report of Meeting, Aequationes Math.*, **29** (1985), 106–107 (with I. Káta).

- [67] On additive number-theoretical functions with values in a compact Abelian group, *Aequationes Math.*, **28** (1985), 288–291 (with I. Kátaí).
- [68] On the general solutions of a system of functional equations on a commutative semigroup. *Period. Math. Hungar.*, **17(1)** (1986), 27–35.
- [69] Intervallfüllende Folgen und volladditive Funktionen. *Acta Sci. Math. (Szeged)*, **50(3-4)** (1986), 337–350. (with A. Járai and I. Kátaí)
- [70] On functions defined by digits of real numbers. *Acta Math. Hungar.*, **47(1-2)** (1986), 73–80. (with A. Járai and I. Kátaí)
- [71] Additive functions. *Anal. Math.*, **12(2)** (1986), 85–96. (with I. Kátaí)
- [72] Continuous additive functions and difference equations of infinite order. *Anal. Math.*, **12(3)** (1986), 237–249. (with I. Kátaí)
- [73] On additive arithmetical functions with values in topological groups. I. *Publ. Math. Debrecen*, **33(3-4)** (1986), 287–291. (with I. Kátaí)
- [74] Generalized-homogeneous deviation means. *Publ. Math. Debrecen*, **33(1-2)** (1986), 53–65. (with Zs. Páles)
- [75] On the distance of finite numbers of given length. *Period. Math. Hungar.*, **18(3)** (1987), 193–201. (with A. Járai and I. Kátaí)
- [76] On additive arithmetical functions with values in the circle group. *Publ. Math. Debrecen*, **34(3-4)** (1987), 307–312. (with I. Kátaí)
- [77] On additive arithmetical functions with values in topological groups. II. *Publ. Math. Debrecen*, **34(1-2)** (1987), 65–68. (with I. Kátaí)
- [78] Problem 283, *Report of Meeting, Aequationes Math.*, **32** (1987), 136–137.
- [79] On differentiable additive functions. *Ann. Univ. Sci. Budapest., Sect. Comp.*, **7** (1988), 1987, 63–66. (with I. Kátaí)
- [80] Functional equations of sum type on a domain. *Ann. Univ. Sci. Budapest., Sect. Comp.*, **8** (1988), 1987, 25–33. (with L. Losonczi)
- [81] Convexity with given infinite weight sequences. *Stochastica*, **11(1)** (1987), 5–12. (with Zs. Páles)
- [82] Generalized number systems in the complex plane. *Acta Math. Hungar.*, **51(3-4)** (1988), 409–416. (with I. Kátaí)
- [83] Interval filling sequences and additive functions. *Acta Sci. Math. (Szeged)*, **52(3-4)** (1988), 337–347. (with I. Kátaí)

- 
- [84] On a functional equation with polynomials. *Acta Math. Hungar.*, **52(3-4)** (1988), 305–320. (with I. Kátai)
- [85] On functions additive with respect to interval filling sequences. *Acta Math. Hungar.*, **51(1-2)** (1988), 185–200. (with I. Kátai)
- [86] A new approach to defining software complexity measures. *Acta Cybernet.*, **8(3)** (1988), 287–291. (with L. Varga)
- [87] Characterization of additive functions with values in the circle group. *Publ. Math. Debrecen*, **36(1-4)** (1990), 1989, 1–7. (with I. Kátai)
- [88] On additive functions taking values from a compact group. *Acta Sci. Math. (Szeged)*, **53(1-2)** (1989), 59–65. (with I. Kátai)
- [89] Characterization of pairs of additive functions with some regularity property. *Publ. Math. Debrecen*, **37(3-4)** (1990), 217–221. (with I. Kátai)
- [90] On completely additive functions related to interval-filling sequences. *Arch. Math. (Basel)*, **54(2)** (1990), 173–179. (with I. Kátai and T. Szabó)
- [91] Some remarks on interval filling sequences and additive functions. In D. Gronau, editor, *Contributions to the Theory of Functional Equations (Graz, 1991)*, volume 315 of *Grazer Math. Berichte*, page 13–24. Karl-Franzens-Univ. Graz, Graz, 1991. (with A. Járai and I. Kátai)
- [92] On positive additive functions with respect to interval filling sequences, and some sequences of integers with gap conditions. *Litovsk. Mat. Sb.*, **31(1)** (1991), 62–75. (with I. Kátai)
- [93] Some regularity properties of algorithms and additive functions with respect to them. *Aequationes Math.*, **41(1)** (1991), 111–118. (with Gy. Maksa and T. Szabó)
