

INDEX OF VOLUME 40

<i>Páles, Zs. and L. Székelyhidi</i> : Laudation to Professor Zoltán Daróczy	9
List of publications of Zoltán Daróczy	21
<i>De Koninck, J.-M. and B.M. Phong</i> : Continuation of the laudation to Professor Imre Kátai	33
Continuation of list of publications of Imre Kátai	49
<i>Abou, I. and P. Liardet</i> : Mixing of Prouhet–Thue–Morse and Rudin–Shapiro sequences	55
<i>Allouche, J.-P.</i> : On a formula of T. Rivoal	69
<i>Bahyrycz, A. and J. Brzdęk</i> : Remarks on some systems of two simultaneous functional inequalities	81
<i>Balyas, L. and P. Varbanets</i> : Twisted exponential sums over the ring of Gaussian integers	95
<i>Barát, A. and K.-H. Indlekofer</i> : Mean-value theorems for uniformly summable multiplicative functions on additive arithmetical semigroups	105
<i>Baron, K.</i> : On some orthogonally additive functions on inner product spaces	123
<i>Bassily, N.L.</i> : On the sum of divisors function	129
<i>Benz, W.</i> : On translations in hyperbolic geometry of arbitrary (finite or infinite) dimension > 1	135
<i>Boros, Z. and N. Nagy</i> : Approximately convex functions	143
<i>Burai, P.</i> : Monotone operators and local-global minimum property of nonlinear optimization problems	151
<i>Burai, P. and J. Jarczyk</i> : Conditional homogeneity and translativity of Makó–Páles means	159
<i>Burcsi, P.</i> : Lonely runners with complex time	173
<i>Czirbusz, S.</i> : Symbolic interval manipulation	183

<i>Daróczy, B., A.A. Benczúr and L. Rónyai</i> : Fisher kernels for image descriptors: a theoretical overview and experimental results ...	201
<i>Farkas, G. and E. Vatai</i> : Sieving for large Cunningham chains of length 3 of the first kind	215
<i>Forti, G.L.</i> : A note on an alternative quadratic equation	223
<i>Fridli, S., Z. Gilián and F. Schipp</i> : Rational Hermite–Fejér interpolation	233
<i>Fülöp, Á.</i> : Estimation of the Kolmogorov entropy in the generalized number system	245
<i>Gát, G.</i> : On the Fejér kernel functions with respect to the character system of the group of 2-adic integers	257
<i>Ger, R.</i> : Alienation of additive and logarithmic equations	269
<i>Gonda, J.</i> : Generalized cyclic congruence	275
<i>Gselmann, E.</i> : On some classes of partial difference equations	285
<i>Indlekofer, K.-H. and R. Wagner</i> : About positive linear functionals on spaces of arithmetical functions	295
<i>Iványi, A., L. Lucz, T. Matuszka and G. Gombos</i> : Score sets in multitournaments I. Mathematical results	307
<i>Ivić, A.</i> : On some mean square estimates for the zeta-function in short intervals	321
<i>Járai, A.</i> : Regularity of functional equations with few variables	337
<i>Jarczyk, W.</i> : Uniqueness of solutions of simultaneous difference equations	353
<i>Jiang, L., S. Kanemitsu and H. Kitajima</i> : Circulants, linear recurrences and codes	363

INDEX OF VOLUME 41

<i>Kačinskaitė, R.</i> : A note on functional independence of some zeta-functions	5
<i>Klesov, O.I. and J.G. Steinebach</i> : How large are the deviations between a distribution function and a stable law	15
<i>Klesov, O.I. and O.A. Tymoshenko</i> : Unbounded solutions of stochastic differential equations with time-dependent coefficients	25
<i>Kominek, Z.</i> : Fix-point free affine transformations having invariant lines	37
<i>Kovács, A.</i> : Simultaneous number systems in the lattice of Eisenstein integers	43
<i>Kozma, L. and Gy. Orbán</i> : On semantic descriptions of software systems	57
<i>Lajkó, K., F. Mészáros and G. Pap</i> : Characterization of bivariate distributions with conditionals of the same type	73
<i>Laurinćikas, A., K. Matsumoto and J. Steuding</i> : On hybrid universality of certain composite functions involving Dirichlet L -functions	85
<i>Lénárd, M.</i> : A $(0, 2)$ -type Pál interpolation problem	97
<i>Losonczi, L.</i> : On homogeneous Páles means	103
<i>Luca, F. and P. Stănică</i> : The Euler function of Fibonacci and Lucas numbers and factorials	119
<i>Maksa, Gy.</i> : On additive functions which differentiate elementary functions in some sense	125
<i>Marley, A.A.J. and C.T. Ng</i> : Quasi-sum representation for an m -place function	137
<i>Matkowski, J.</i> : Iterations of the mean-type mappings and uniqueness of invariant means	145
<i>Mauclaire, J.-L.</i> : Simple remarks on some Dirichlet series	159

<i>Misevičius, G. and A. Rimkevičienė</i> : Joint limit theorems for periodic Hurwitz zeta-function. II	173
<i>Murata, L. and K. Chinen</i> : On a distribution property of the residual order of $a \pmod{pq}$	187
<i>Nowak, A. and M. Sablik</i> : Chini's equations in actuarial mathematics	213
<i>Páles, Zs.</i> : On Wright- but not Jensen-convex functions of higher order	227
<i>Phong, B.M.</i> : Note on the identity function	235
<i>Prinz, R. and J. Schwaiger</i> : On a characterization of achieved quota with respect to given target values by means of functional equations	243
<i>Quynh, T.C., M.T. Koşan and P.T. Hai</i> : A note on regular morphisms	249
<i>Radova, A.S. and S.P. Varbanets</i> : Divisor function $\tau_3(\omega)$ in arithmetic progression	261
<i>Reich, L. and J. Tomaschek</i> : On the characterization of generalized Dhombres equations having non constant local analytic or formal solutions	281
<i>Román, G.</i> : Producing class numbers for the Atkin–Morain primality test	295
<i>Szabó, S.</i> : Monotonic matrices and clique search in graphs	307
<i>Székelyhidi, L. and L. Vajday</i> : On conditional functional equations with applications on hypergroups	323
<i>Szili, L.</i> : Some identities with applications	333
<i>Tóth, V.</i> : Collision and avalanche effect in pseudorandom sequences	347
<i>Vatai, E.</i> : Inverse sieve	355
<i>Weisz, F.</i> : Orthogonality relations for continuous wavelet transforms	361

ANNALES UNIVERSITATIS SCIENTIARUM
BUDAPESTINENSIS
DE ROLANDO EÖTVÖS NOMINATAE
SECTIO COMPUTATORICA

Publication. Yearly 2 issues are scheduled to appear, which are available from the Department of Computer Algebra of the Eötvös Loránd University, Budapest, XI. Pázmány Péter sét. 1/C.

Editorial policy. This journal publishes research and, in special cases, survey papers treating problems from a broad field of applied mathematics and computer science written with mathematical precision, giving priorities to articles connected with the activities and interests within the departments of applied mathematics and computer science of the Eötvös University. The areas of main interest are: classical numerical analysis, modern theories of algorithms of approximation, their optimization both in deterministic and stochastic cases, summation of series, modelling and simulation, mathematical system theory, estimations of computational complexity, theory of automata, languages and system programming. Reviews of new books, both from and outside Hungary, will be also published.

Instructions for authors. Manuscripts should be submitted in two exemplars or in electronic form (the TEX and PDF files) - written in English, German or French and prepared in form as the ones already appeared - to the editor-in-chief
