INDEX OF VOLUME 42

Demetrovics, J.: Laudation to Professor András Benczúr 5

List of publications of András Benczúr 9

Arató, M. and L. Martinek: Estimation of claim numbers in automobile insurance 19

Aszalós, L., J. Kormos and D. Nagy: Conjectures on phase transition at correlation clustering on random graphs 37

Bánsághi, A. and A. Kovács: Trend analysis based on semantic graphs - A case study 55

Bou Ezzeddine, A., S. Kasala and P. Navrat: Applying the firefly approach to the DNA fragments assembly problem 69

Buza, A. and P. B. Kiss: Instability of matrix factorization used in recommender systems 83

Csiszár, O. and J. Fodor: On uninorms with fixed values along their border 93

Csiszár, V., T. Fegyverneki and T.F. Móri: Explicit multivariate bounds of Chebyshev type 109

De Koninck, J.-M. and I. Kátai: Constructing normal numbers using residues of selective prime factors of integers 127

Demetrovics, J., Hua Nam Son and A. Guban: An algebraic approach to the study of market baskets 135

Demetrovics, J., Vu Duc Thi and Nguyen Long Giang: Metric based attribute reduction in dynamic decision tables 157

Dobos, L., B. Pinczel, A. Kiss, G. Rácz and T. Eiler: A comparative evaluation of NoSQL database systems 173

Hajas, Cs. and A. Zempléni: Data mining of extreme value modelling European precipitation data 199

Kátai, I. and Bui Minh Phong: Uniform distribution of some arithmetical functions 209

Kovács, L.: Remarks on the approximation for the number of rooted unordered binary trees 219

Krámli, A. and R. Markó: Lower threshold ground state energy and testability of minimal balanced cut density 231

Mészáros, T. and L. Rónyai: A note on Alon's combinatorial Nullstellensatz 249

Molnár, B.: Applications of hypergraphs in informatics: A survey and opportunities for research 261

Pinczel, B., D. Nagy and A. Kiss: The Pros and Cons of RDF structure indexes 283
