

**CORRECTION TO MY PAPER
"LAUDATION TO DR. BUI MINH PHONG
ON HIS 60TH ANNIVERSARY"**

Imre Kátai (Budapest, Hungary)

In the above mentioned paper published in the same journal Vol. 38 (2012), 5-13, I asserted that the result formulated in Theorem II has been proved by Bui Minh Phong. I have forgotten to mention that this theorem in the case $c = 1$ had been proved earlier (1977) by Jean-Loup Mauclaire. It was a part of his doctorate thesis, defended in 1977, and presented in Séminaire Delange-Pisot-Poiton: Sur certaines fonctions arithmétiques, 1978, Séminaire D.P.P. 1976/1977, see Théorème III.2, page 26-5.

A detailed proof is given in his doctoral thesis report:

J.-L. Mauclaire: Contribution à la théorie des fonctions additives, Publications Mathématiques d'Orsay, n. 7665.
