

INDEX OF VOLUME 46

<i>Burcsi, P.</i> : To the memory of Professor Antal Iványi	5
List of publications of Antal Iványi	7
<i>De Koninck, J.-M. and I. Kátai</i> : Normal numbers in generalized number systems in Euclidean spaces	15
<i>De Koninck, J.-M. and I. Kátai</i> : On the distribution of the number of prime factors of the k -fold iterate of various arithmetic functions	27
<i>Farkas, G. and Zs. Juhász</i> : A generalization of Goldbach's conjecture	39
<i>Gonda, J.</i> : On the variables of the conjunctively polynomial-like Boolean functions	55
<i>Hajas, Cs. and A. Zempléni</i> : Chess and bridge clustering the countries	67
<i>Hudoba, P. and A. Kovács</i> : Some improvements on number expansion computations	81
<i>Kallós, G.</i> : Supplement to paper "On some problems of expansions investigated by P. Erdős et al"	97
<i>Kátai, I. and B.M. Phong</i> : Multiplicative functions with small increments	105
<i>Kátai, I. and B.M. Phong</i> : On the equation $f(n^2) = g^2(n)$ for q -additive functions f and g	115
<i>Khanh, B.M.M.</i> : On conjecture concerning the functional equation ..	123
<i>Korňyik, M. and Gy. Michaletzky</i> : On the moments of roots of Laguerre-polynomials and the Marchenko-Pastur law	137
<i>Krutki, T. and G. Nagy</i> : On simultaneous number systems with 3 bases	153
<i>László, L.</i> : An inequality and some equalities for the midradius of a tetrahedron	165
<i>Lócsi, L. and F. Schipp</i> : Rational Zernike functions	177

<i>Móri, T.F. and S. Rokob</i> : A random graph model driven by time-dependent branching dynamics	191
<i>Németh, Zs.</i> : On optimal unit fraction bin packing	215
<i>Phong, B.M.</i> : A multiplicative function with equation $f(p + m^3) = f(p) + f(m^3)$	223
<i>Radova, A. and S. Varbanets</i> : On exponential sums involving the divisor function over $\mathbb{Z}[i]$	235
<i>Román, G.</i> : Primality proofs with elliptic curves: expected number of curve orders	247
<i>Varbanets, P. and S. Varbanets</i> : Inversive generator of the second order with a variable shift for the sequence of PRN's	255
<i>Akın, A. and A. Tekcan</i> : The integer sequence a_n and its relationship with Pell, Pell–Lucas and balancing numbers	275
<i>Vu Hoai An and Pham Ngoc Hoa</i> : On the uniqueness problem of non-Archimedean meromorphic functions and their differential polynomials	289
<i>Akın, A. and A. Tekcan</i> : The Pell equation $x^2 - (k^2 - 2)y^2 = 1$ and the corresponding integer sequence	303
<i>Tran Nam Sinh and Phan Van Thien</i> : Segre's upper bound for the regularity index of $2n + 2$ non-degenerate double points in \mathbb{P}^n	327
<i>Argyros, I.K., P.K. Parida and Salahuddin</i> : Ball convergence of an efficient fifth order iterative methods under weak conditions	341
<i>Argyros, I.K. and S. Georg</i> : Improved convergence conditions of a Lavrentiev-type method for nonlinear ill-posed equations by using restricted convergence domains.....	355

UNSOLVED PROBLEMS SECTION

<i>Kátai, I. and B.M. Phong</i> : Characterization of some multiplicative functions	373
