

INDEX OF VOLUME 47

<i>Székelyhidi, L.</i> : Continuation of the laudation to Professor Zoltán Daróczy on his eightieth birthday	9
Continuation of list of publications of Zoltán Daróczy	19
<i>De Koninck, J.-M. and B.M. Phong</i> : Continuation of the laudation to Professor Imre Kátai on his eightieth birthday	21
Continuation of list of publications of Imre Kátai	31
<i>Kátai, I.</i> : Continuation of the laudation to Professor Karl-Heinz Indlekofer on his 75-th birthday	35
Continuation of list of publications of Karl-Heinz Indlekofer	45
<i>Kátai, I.</i> : Laudation to Professor Jean-Marie De Koninck on his seventieth birthday	47
List of publications of Jean-Marie De Koninck	63
<i>Gselmann, E.</i> : Laudation to Professor Gyula Maksa on his seventieth birthday	75
List of publications of Gyula Maksa	79
<i>Kátai, I.</i> : Continuation of the laudation to Professor Bui Minh Phong on his 65-th birthday	87
Continuation of list of publications of Bui Minh Phong	97
<i>Simon, P.</i> : Laudation to Professor Sándor Fridli on his sixtieth birthday	101
List of publications of Sándor Fridli	103
Congratulation	107
<i>An, V.H. and P.N. Hoa</i> : A new class of unique range sets for meromorphic functions	109
<i>An, V.H. and H.H. Khoai</i> : On uniqueness for meromorphic functions and their n th derivatives	117
<i>Argyros, I.K., J.R. Sharma and D. Kumar</i> : On the local convergence of weighted-Newton methods under weak conditions in banach spaces	127

<i>Banerjee, S, B.-W. Li, R.-H. Liu, Y. Song and S. Kanemitsu:</i> Some accessible treatment of algebraic isomorphisms	141
<i>Bareikis, G. and A. Mačiulis:</i> Beta distribution in arithmetical semigroups	147
<i>Bognár, G. and F. Schipp:</i> Geometric interpretation of QRS complexes in ECG signals by rational functions	155
<i>Bundschuh, P. and K. Väänänen:</i> An application of Mahler's method to continued fractions	167
<i>Burai, P. and J. Jarczyk:</i> On symmetry of Makó-Páles means	173
<i>Chakraborty, K. and A. Hoque:</i> Class groups of imaginary quadratic fields of 3-rank at least 2	179
<i>Chakraborty, K, S. Kanemitsu and T. Kuzumaki:</i> Seeing the invisible: around generalized Kubert functions	185
<i>Csabai, I., L. Dobos, A. Kiss and J. M. Szalai-Gindl:</i> Some mathematical properties of the performance measures applied for point cloud databases	197
<i>Császár, Sz. and S. Kovács:</i> Exponential dichotomy and the stability of linear systems	211
<i>Dai, N.A. and N.X. Thao:</i> Generalized convolutions with weight-function for discrete-time Fourier cosine and sine transforms	227
<i>Diamond, H.G.:</i> Convolution square root of 1 and the prime number theorem	239
<i>Doyon, N. and V. Ouellet:</i> On the sum of the reciprocals of the middle prime factor counting multiplicity	249
<i>Doyon, N. and A. Richard:</i> Enumeration of connected feedforward networks	261
<i>Ger, R.:</i> Solving alternative functional equations: What for?	273
<i>Gonda, J.:</i> Elements of the hyperoctahedral group of given norm and deviation	285
<i>Herzog, G. and P. Volkmann:</i> Quasimonotonicity and functional inequalities	293
<i>Ivić, A.:</i> On sums of squares of $ \zeta(\frac{1}{2} + i\gamma) $ over short intervals.....	297
