

INDEX OF VOLUME 49

<i>Weisz, F.</i> : Continuation of the laudation on the 80-th birthday of Professor Ferenc Schipp	9
Continuation of list of publications of Ferenc Schipp	11
<i>Fridli, S.</i> : Continuation of the laudation on the 70-th birthday of Professor Péter Simon	15
Continuation of list of publications of Péter Simon	17
<i>Argyros, I.K., J.R. Sharma and S. Kumar</i> : On the local convergence and complex geometry of eighth order iteration function	19
<i>Bognár, G. and S. Fridli</i> : On the pole stability of rational approximation	35
<i>Boyer, R., K. Nowak and M. Pap</i> : Unitary equivalence of lowest dimensional reproducing formulae of type $\mathcal{E}_2 \subset Sp(2, \mathbb{R})$	53
<i>Chuprunov, A. and I. Fazekas</i> : Poisson limit theorems for the generalized allocation scheme	77
<i>Csabai, I., L. Dobos, A. Kiss and J.M. Szalai-Gindl</i> : Load balancing in distributed point cloud databases	97
<i>Daróczy, Z.</i> : Problems and results on generalized quasi-arithmetic means	117
<i>De Koninck, J.-M., I. Kátai and B.M. Phong</i> : On some consequences of recently proved conjectures	123
<i>Dobi, B. and A. Zempléni</i> : Markov chain-based cost-optimal control charts with different shift size distributions	129
<i>Farkas, G., K. Lőrincz, P. Magyar and A. Molnár</i> : Recommender systems based on matrix factorization for agricultural datasets	147
<i>Farkov, Yu. A.</i> : Wavelet tight frames in Walsh analysis	161
<i>Fechner, Ž and L. Székelyhidi</i> : Functional equations on an infinite hypergroup join	179

<i>Gát, Gy.</i> : On the convergence of Fejér means of some subsequences of partial sums of Walsh–Fourier series	187
<i>Golubov, B.I. and S.S. Volosivets</i> : Generalized dyadic derivative and uniform convergence of its Walsh–Fourier series	199
<i>Gonda, J.</i> : Symmetric polynomial-like Boolean functions	209
<i>Gustavo, M. and J. Tóth</i> : Comparing computational speed of <i>MATLAB</i> and <i>Mathematica</i> across a set of benchmark number crunching problems	219
<i>György, Sz. and S. Kovács</i> : Approximating homoclinic orbits of autonomous systems via discrete dichotomies	229
<i>Indlekofer, K.-H.</i> : On the uniform distribution and uniform summability of positive valued multiplicative functions	249
<i>Járai, A.</i> : Error estimates for multiplication based on FFT over the complex numbers	259
<i>I. Kátai and B.M. Phong</i> : On additive arithmetical functions with values in topological groups IV.	279
<i>Khanh, B.M.M.</i> : A note on a result of B. Bojan	285
<i>Kuznetsova, M.A. and Volosivets, S.S.</i> : Partial best approximations and magnitude of double Fourier–Vilenkin coefficients	299
<i>László, L.</i> : An inequality for the areas of Poncelet triangles	317
<i>Lócsi, L.</i> : Introducing p -eigenvectors, exact solutions for some simple matrices	325
<i>Losonczi, L.</i> : Extensions of Vieiras theorems on the zeros of self-inversive polynomials	347
<i>Pandey, P.K.</i> : The numerical solution of third order boundary value problems in PDEs by the finite difference method	359
<i>Román, G.</i> : On the memory consumption of the controlled euclidean descend	369
<i>Skvortsov, V.</i> : Recovering Banach-valued coefficients of series with respect to characters of zero-dimensional groups	379
<i>Thien, P.V. and Trinh, T.T.V.</i> : An estimate of the regularity index of fat points in some cases	399
<i>Weisz, F.</i> : Weighted Hardy spaces and the Fejér means of Walsh–Fourier series	411

UNSOLVED PROBLEMS

- De Koninck, J.-M., I. Kátai and B.M. Phong*: Three new
conjectures related to the values of arithmetic functions at
consecutive integers 425

BOOK REVIEW

- Weisz, F.*, Convergence and Summability of Fourier Transforms
and Hardy Spaces (Reviewer: Ferenc Schipp)..... 429
