

## INDEX OF VOLUME 52

<i>Kozma, L.</i> : To the memory of Professor László Varga .....	7
<i>An, V. H., N. X. Lai and N. D. Phuong</i> : Uniqueness of meromorphic functions with deficient values and unique range sets of small cardinalities .....	13
<i>Anastassiou, G. A.</i> : E.R. Love type right side fractional integral inequalities .....	29
<i>Argyros, I. K., G. Argyros, M. Argyros and S. George</i> : Extended local convergence analysis of a three-step method a parameter of convergence order six .....	45
<i>Babati, B. and N. Pataki</i> : Evaluation of predicates in the C++ Standard Template Library .....	57
<i>Cserép, M. and R. Szendrei</i> : UML based modeling and code generation of network protocols .....	73
<i>De Koninck, J.-M. and I. Kátai</i> : On an open question regarding generalized number systems in Euclidean spaces .....	93
<i>Dózsa, T. and F. Schipp</i> : A generalization of the root function .....	97
<i>Fábián, G.</i> : Minimizing numerical error in computing integrals over polygonal domains .....	109
<i>Fazekas, I. and M. O. Suja</i> : Limit theorems for contaminated runs of heads .....	131
<i>Gonda, J.</i> : Some results on homogeneous symmetric polynomial-like Boolean functions .....	147
<i>Gregorics, T.</i> : Time complexity of $A^{**}$ .....	163
<i>Kátai, I. and B. M. Phong</i> : A characterization of functions using Lagrange’s Four-Square Theorem .....	177
<i>Kátai, I. and B. M. Phong</i> : On a conjecture regarding multiplicative functions .....	187
<i>Khanh, B. M. M.</i> : Characterization of the identity function with an equation function .....	195

---

<i>Khanh, B. M. M.</i> : On the equation $f(n^2 + Dm^2 + k) = f(n)^2 + Df(m)^2 + k$ .....	217
<i>Letendre, P.</i> : A hybrid inequality for the number of divisors of an integer .....	243
<i>Phong, B. M. and R. B. Szeidl</i> : On the equation $f(n^2 + nm + m^2) = f(n)^2 + f(n)f(m) + f(m)^2$ .....	255
<i>Román, G.</i> : Primality proofs with elliptic curves: on the distribution and the expected value of the gain during downrun .....	279
<i>Rozner, B.</i> : Stochastic processes on random graphs with multiple type edges .....	293
<i>Toledo, R.</i> : Solving systems of linear differential equations by Walsh polynomials approach .....	313
<i>Varga, L. Z.</i> : The autonomous agent and multi-agent paradigm in software engineering .....	349
