

INDEX

<i>F. Szidarovszky and K. Okuguchi</i> : On a general stackelberg-type leader-follower oligopoly model.....	3
<i>Béla Kiss</i> : An iterative method for nonselfadjoint elliptic problems on regions partitioned into substructures	19
<i>Yu Song-Nian</i> : A computer-assisted number theoretical construction of $(3,k)$ -Ramsey graphs	35
<i>Kumud Singh</i> : Nonlinear elliptic systems in unbounded domain with quadratic growth conditions.....	45
<i>Valéria Novitzka</i> : Formal semantics of anna packages	67
<i>R.H. Farzan - A.SH. Mohamed</i> : Free boundary elastic-plastic problem.....	83
<i>János C. Fodor</i> : On domains of attraction of extreme value distributions via generalized concavity - convexity.....	89
<i>Anna Krebsz</i> : A proximity test for second order divisors.....	97
<i>K. Károlyi, Gy. Varjú</i> : Multipoint boundary value problems for calculating the screening effect of a metal cable sheath with non-linearity due to steel armouring	109
<i>M. Horváth, I. Joó and A. Sövegjártó</i> : On Sturm-Liouville difference equations*	135
<i>Rafat Riad</i> : Block-pulse functions series solution of time-varying linear systems of higher order	167
<i>Ali Shauket Mohamed</i> : Approximate solution for an elastic problem by spline function of programming.....	189

<i>R.H. Farzan, A.SH. Mohamed:</i> On a free boundary two-dimesional problem	211
<i>Castillo E. and Alvarez E.:</i> A shell structure of probabilistic type for expert systems.....	221
<i>E. H. Doha:</i> An accurate double chebyshev spectral approximation for poisson's equation	243
<i>Zoltán Horváth:</i> Fundamental relation operations in the mathematical models of programming	277
<i>Tharwat Fawzy and Samia Soliman:</i> A spline approximation method for the initial value problem $y^{(n)} = f(x, y, y')$	299
