

INDEX

<i>Káta I.</i> : Imre Környei	3
List of publications of Imre Környei	5
<i>Káta I.</i> : Béla Kovács	7
List of publications of Béla Kovács	9
<i>Almási B.</i> : A queueing model for a non-homogeneous polling system subject to breakdowns	11
<i>Bassily N.L., Ishak S. and Káta I.</i> : On additive functions with respect to the expansion of real numbers into generalized number systems	25
<i>Bui Minh Phong</i> : Reduced residue systems and a problem for multiplicative functions	35
<i>Farkas G.</i> : Number systems in real quadratic fields	47
<i>Gaál I.</i> : Power integer bases in algebraic number fields	61
<i>Galambos J.</i> : Approximation of real numbers by rationals via series expansions	89
<i>Indlekofer K.-H. and Timofeev N.M.</i> : Almost-periodic multiplicative functions on the set of shifted primes	95
<i>Káta I.</i> : Construction of number systems in algebraic number fields	103
<i>Kiss P. and Liptai K.</i> : Solution of diophantine equations by second order linear recurrences	109
<i>Kovács A.</i> , Sets of complex numbers generated from a polynomial functional equation	115
<i>Kovács M.</i> : On the convexity of fuzzified functions	125
<i>Lakatos L.</i> : On the $M^X/G/1$ system	137
<i>Mauclaire J.-L.</i> : On the distribution of the values of an additive arithmetical function with values in a locally compact abelian group II.	151
<i>Mauclaire J.-L.</i> : A characterization of some additive arithmetical functions II.	161

<i>Pethő A.:</i> On the periodic expansion of algebraic numbers	167
<i>Stepanauskas G.:</i> The mean values of multiplicative functions I.	175
<i>Zay B.:</i> A connection between a class of iterative recurrence relations and some word sequences	187
