

INDEX

<i>Haroten H.A.</i> : Nonnegativity of the numerical solution of three-dimensional heat-conduction equation	3
<i>Tuwegiar I.</i> : Newton-relaxation schemes for nonlinear fluid flow equations	13
<i>Argyros I.K.</i> : A mesh independence principle for inexact Newton-type methods and their discretizations	31
<i>Horváth A. and Horváth Z.</i> : On fast numerical solutions of special stiff equations arising in astrophysics	55
<i>Lénárd M.</i> : Simultaneous approximation to a differentiable function and its derivative by Pál-type interpolation on the roots of Jacobi polynomials	71
<i>Pittaluga G., Sacripante L. and Venturino E.</i> : Lacunary interpolation with arbitrary data of high order	83
<i>Bui Minh Phong</i> : Reduced residue systems and a problem for multiplicative functions II.	97
<i>Márkus T., Moroşanu C. and Varga V.</i> : Stochastic query optimization in distributed databases using semijoins	107
<i>Farkas G.</i> : Location and number of periodic elements in $\mathbb{Q}(\sqrt{2})$	133
<i>Gonda J.</i> : Transformation of the canonical disjunctive normal form of a Boolean function to its Zhegalkin-polynomial and back	147
<i>De Koninck J.-M. and Doyon N.</i> : On a very thin sequence of integers ...	157
<i>Szlávik Á.</i> : A noninverse general matrix analytical solution method	179
<i>Kovács A.</i> : Generalized binary number systems	195
<i>Farkas G. and Abdalla W.S.</i> : Numerical investigation of the convergence to the limit distribution in a cyclic-waiting system	207
<i>Szigeti F. and Ríos-Bolívar A.</i> : Iterative modelling in H_∞ framework	221
<i>Kocsor A., Dombi J. and Bálint I.</i> : An optimization algorithm for determining eigenpairs of large real pairs	237
