

## LIST OF PUBLICATIONS

*Janos Galambos*

- [1] Egy számelméleti eloszlásprobléma (A distribution problem in the theory of numbers), *Matematikai Lapok*, **14** (1963), 88–97.
- [2] On the distribution of number theoretical functions, *Annales Univ. Sci. Budapest., Sect. Math.*, **7** (1964), 25–31.
- [3] On the sieve methods in probability theory I, *Studia Sci. Math. Hungar.*, **1** (1966), 39–50.
- [4] On the distribution of prime-independent number theoretical functions, *Archiv der Mathematik*, **19** (1968), 296–299.
- [5] On quadratic inequalities in the theory of probability (with A. Rényi), *Studia Sci. Math. Hungar.*, **3** (1968), 351–358.
- [6] Quadratic inequalities among probabilities, *Annales Univ. Sci. Budapest., Sectio Math.*, **12** (1969), 11–16.
- [7] A probabilistic approach to mean values of multiplicative functions, *Journal of the London Math. Soc.* (2), **2** (1970), 405–419.
- [8] Distribution of arithmetical functions, A survey, *Annales de l'Institut Henri Poincaré, Section B*, **6** (1970), 281–305.
- [9] The ergodic properties of the denominators in the Oppenheim expansion of real numbers into infinite series of rationals, *The Quarterly Journal of Math., Oxford Second Series*, **21** (1970), 177–191.
- [10] On the sieve methods in probability theory II, *Ghana Journal of Science*, **10** (1970), 11–15.
- [11] Limit distribution of sums of dependent random variables with applications to arithmetical functions, *Zeitschrift für Wahrscheinlichkeitstheorie und verwandte Gebiete*, **18** (1971), 261–270.
- [12] A generalization of a theorem of Borel concerning the distribution of digits in dyadic expansions, *American Mathematical Monthly*, **18** (1971), 774–779.

- [13] Some statistical problems leading to sequential methods, *Bulletin of the International Statistical Institute, Contributed Papers, 38th Session (Washington, D.C.)*, (1971), 141–145.
- [14] Some probabilistic aspects of majorization, *Annales Univ. Sci. Budapest., Sect. Math.*, **14** (1971), 11–17.
- [15] On the speed of convergence of the Oppenheim series, *Acta Arithmetica*, **19** (1971), 681–690.
- [16] On the distribution of strongly multiplicative functions, *Bulletin of the London Mathematical Society*, **3** (1971), 307–312.
- [17] Distribution of additive and multiplicative functions, In: *The Theory of Arithmetic Functions* (eds.: A.A. Gioia and D.L. Goldsmith), Lecture Notes in Mathematics, Springer Verlag, **251** (1971), 127–139.
- [18] On a model for a fair distribution of gifts, *J. Appl. Prob.*, **8** (1971), 681–690.
- [19] Characterization of certain populations by independence of order statistics, *Journal of Applied Probability*, **9** (1972), 224–230.
- [20] Some remarks on the Luroth expansion, *Czechoslovak Mathematical Journal*, **22** (1972), 266–271.
- [21] On the distribution of the maximum of random variables, *Annals of Mathematical Statistics*, **43** (1972), 516–521.
- [22] The distribution of the largest coefficient in continued fraction expansions, *The Quarterly Journal of Mathematics, Oxford Second Series*, **23** (1972), 147–151.
- [23] The Hausdorff dimension of sets related to  $g$ -expansions, *Acta Arithmetica*, **20** (1972), 385–392.
- [24] On the asymptotic distribution of values of arithmetical functions, *Atti della Accademia Nazionale dei Lincei. Rendiconti. Classe di Scienze Fisiche, Matematiche e Naturali*, **52** (1972), 126–131.
- [25] A constructive uniqueness theorem on representing integers, *Fibonacci Quarterly*, **10** (1972), 569–570 and 598.
- [26] The role of graph theory in some sieve arguments of probability theory, In: *Graph Theory and Applications* (eds.: Y. Alavi et al.), Lecture Notes in Math., Springer **303** (1972), 81–87.
- [27] The largest coefficient in continued fractions and related problems, In: *Diophantine Approximations and its Applications*, (ed.: C.F. Osgood), Academic Press, New York, 1973, pp. 101–109.

- [28] Integral limit laws for additive functions, *Canadian Journal of Mathematics*, **25** (1973), 194–203.
- [29] Probabilistic theorems concerning expansions of real numbers, *Periodica Math. Hungar.*, **3** (1973), 101–113.
- [30] The distribution of the maximum of a random number of random variables with applications, *Journal of Applied Probability*, **10** (1973), 122–129.
- [31] Approximations of arithmetical functions by additive ones, *Proceedings of the American Mathematical Society*, **39** (1973), 19–25.
- [32] A general Poisson limit theorem of probability theory, *Duke Mathematical Journal*, **40** (1973), 581–586.
- [33] Regularly varying sequences, *Proceedings of the American Mathematical Society*, **41** (1973), 110–116. (with E. Seneta)
- [34] On infinite series representations of real numbers, *Compositio Mathematica*, **27** (1973), 197–204.
- [35] A limit theorem with applications in order statistics, *Journal of Applied Probability*, **11** (1974), 219–222.
- [36] Sums of reciprocals of additive functions, *Acta Arithmetica*, **25** (1974), 159–164. (with J.-M. De Koninck)
- [37] An iterated logarithm type theorem for the largest coefficient in continued fractions, *Acta Arithmetica*, **25** (1974), 359–364.
- [38] Further ergodic results on the Oppenheim series, *The Quarterly Journal of Mathematics, Oxford Second Series*, **25** (1974), 135–141.
- [39] Asymptotic distribution of normalized arithmetical functions, *Proceedings of the American Mathematical Society*, **46** (1974), 1–8. (with P. Erdős)
- [40] The asymptotic theory of concomitants of order statistics, *Journal of Applied Probability*, **11** (1974), 762–770. (with H.A. David)
- [41] Methods for proving Bonferroni type inequalities, *Journal of the London Mathematical Society* (2), **9** (1975), 561–564.
- [42] Characterizations in terms of properties of the smaller of two observations, *Communications in Statistics*, **4** (1975), 239–244.
- [43] Characterizations of probability distributions by properties of order statistics I (discrete distributions), *Statistical Distributions in Scientific Work*, **3** (1975), 71–88.

- [44] Characterizations of probability distributions by properties of order statistics II (discrete distributions), *Statistical Distributions in Scientific Work*, **3** (1975), 89–102.
- [45] Record times, *Proceedings of the American Mathematical Society*, **50** (1975), 383–387. (with E. Seneta)
- [46] Order statistics of samples from multivariate distributions, *Journal of the American Statistical Association*, **70** (1975), 674–680.
- [47] Limit laws for mixtures with applications to asymptotic theory of extremes, *Zeitschrift für Wahrscheinlichkeitstheorie und verwandte Gebiete*, **32** (1975), 197–207.
- [48] A remark on the theory of sums with random size, *Mathematical Proceedings of the Cambridge Philosophical Society*, **79** (1976), 531–532.
- [49] On a problem of Erdős on large prime divisors of  $n$  and  $n + 1$ , *Journal of the London Mathematical Society*, **58** (1976), 263–266.
- [50] The rate of growth of the denominators in the Oppenheim series, *Proceedings of the American Mathematical Society*, **58** (1976), 9–13.
- [51] The density of a sequence defined in terms of additive functions, *Publicationes Mathematicae Debrecen*, **23** (1976), 263–266.
- [52] Uniformly distributed sequences mod 1 and Cantor’s series representation, *Czechoslovak Mathematical Journal*, **26** (1976), 636–641.
- [53] *Representations of Real Numbers by Infinite Series*, Springer Verlag, Lecture Notes in Mathematics Series, Vol. **502**, 1976.
- [54] The sequence of prime divisors of integers, *Acta Arithmetica*, **31** (1976/77), 9–14.
- [55] The asymptotic theory of extreme order statistics, In: *The theory and applications of reliability* (eds.: Ch.Tsokos et al.), Academic Press, 1977, pp.151–164.
- [56] The number of large prime divisors of consecutive integers, *Journal of Number Theory*, **9** (1977), 338–341.
- [57] The absolute continuity of a limit law for Sylvester series, *Compositio Mathematica*, **35** (1977), 125–128.
- [58] Exchangeable variates. Limit laws for exchangeable variables, In: *Urn models and their applications* (eds.: N.L. Johnson et al.), Wiley, New York, 1977, 97–105.

- [59] Bonferroni inequalities, *Annals of Probability*, **5** (1977), 577–581.
- [60] *The asymptotic theory of extreme order statistics*, Wiley, New York, 1978.
- [61] *Characterizations of Probability Distributions*, Springer Verlag, Lecture Notes in Mathematics Series, Vol. **675**, 1978. (with S. Kotz)
- [62] Inequalities for linear combinations of binomial moments, *Publicationes Mathematicae Debrecen*, **27** (1980), 263–268. (with R. Mucci)
- [63] Extreme value theory in applied probability, *The Mathematical Scientist*, **6** (1981), 13–26.
- [64] Failure time distributions: estimates and asymptotic results, *Statistical Distributions in Scientific Work*, **5** (1981), 309–318.
- [65] The role of exchangeability in the theory of order statistics, In: *Exchangeability in Probability and Statistics* (eds.: G. Koch et al.), North Holland, Amsterdam, 1982, pp.75–86.
- [66] The role of functional equations in stochastic model building, *Aequationes Mathematicae*, **25** (1982), 21–41.
- [67] Characterizations of distributions, *Encyclopedia of Statistical Sciences* (Wiley), **2** (1982), 583–587.
- [68] Exponential distribution, *Encyclopedia of Statistical Sciences* (Wiley), **2** (1982), 583–587.
- [69] A statistical test for extreme value distributions, In: *Non-parametric methods in statistics* (eds.: B.V. Gnedenko et al.), North Holland, Amsterdam, 1982, 221–230.
- [70] Exchangeability, *Encyclopedia of Statistical Sciences* (Wiley), **2** (1982), 573–577.
- [71] Some characterizations of the exponential distribution via properties of the geometric distribution, In: *Contributions to Statistics: Essays in Honour of Norman L. Johnson* (ed.: P.K. Sen), North Holland, Amsterdam, 1983, 159–163. (with S. Kotz)
- [72] *Introductory Probability Theory*, Marcel Decker, New York, 1984.
- [73] *The Asymptotic Theory of Extreme Order Statistics*, Russian Edition of [60], Nauka, Moscow, 1984.
- [74] Order statistics, In: *Handbook of Statistics*, Vol. **4** (eds.: P.R. Krishnaiah et al.), North Holland, Amsterdam, 1984, 359–382.

- [75] Introduction, Order statistics, Exceedances, In: *Statistical Extremes and Applications* (ed.: J. Tiago de Oliveira), Reidel, Dordrecht, 1984, 3–17.
- [76] Asymptotics, Stable laws for extremes, Tail properties, In: *Statistical Extremes and Applications* (ed.: J. Tiago de Oliveira), Reidel, Dordrecht, 1984, 19–29.
- [77] Rates of convergence in extreme value theory, In: *Statistical Extremes and Applications* (ed.: J. Tiago de Oliveira), Reidel, Dordrecht, 1984, 347–352.
- [78] A new bound on multivariate extreme value distributions, *Annales Univ. Sci. Budapest, Sect. Math.*, **27** (1985), 37–41.
- [79] Multivariate order statistics, *Encyclopedia of Statistical Sciences* (Wiley), **6** (1985), 100–104.
- [80] Multivariate stable distributions, *Encyclopedia of Statistical Sciences* (Wiley), **6** (1985), 125–129.
- [81] A note on random walks in multidimensional time, *Mathematical Proceedings of the Cambridge Philosophical Society*, **99** (1986), 163–170. (with I. Kátai)
- [82] On a conjecture of Kátai concerning weakly composite numbers, *Proceedings of the American Mathematical Society*, **96** (1986), 215–216.
- [83] Probabilistic number theory, *Encyclopedia of Statistical Sciences* (Wiley), **7** (1986), 199–204.
- [84] Raikov’s theorem, *Encyclopedia of Statistical Sciences* (Wiley), **7** (1986), 503.
- [85] On the distribution of multiplicative arithmetical functions, *Acta Arithmetica*, **47** (1986), 57–62. (with P. Szüsz)
- [86] *The Asymptotic Theory of Extreme Order Statistics*, 2nd ed., Krieger, Melbourne, Florida, 1987.
- [87] Lifetime regression models based on a functional equation of physical nature, *Journal of Applied Probability*, **24** (1987), 160–169. (with E. Castillo)
- [88] Some remarks on random walks in multidimensional time, In: *Proceedings of the Fifth Pannonian Symposium on Mathematical Statistics* (eds.: J. Mogyoródi et al.), Reidel, Dordrecht, 1987, 65–74. (with I. Kátai)
- [89] A renewal theorem for random walks in multidimensional time, *Transactions of the American Mathematical Society*, **300** (1987), 759–769. (with K.-H. Indlekofer and I. Kátai)
- [90] Bivariate distributions with normal conditionals, In: *Simulation, Modelling and Development* (ed.: M.H. Hamza), Acta Press, Anaheim, 1987, 59–62. (with E. Castillo)

- [91] The intermediate prime divisors of integers, *Proceedings of the American Mathematical Society*, **101** (1987), 213–216. (with J.-M. De Koninck)
- [92] Restricted domains of attraction of  $\exp(-e(-x))$ , *Stochastic Processes and their applications*, **25** (1987), 265–271. (with A. Obretenov)
- [93] The gaps in a particular sequence of integers of positive density, *Journal of the London Mathematical Society* (2), **36** (1987), 429–435. (with I. Kátai)
- [94] *Advanced Probability Theory*, Marcel Dekker, New York, 1988.
- [95] Truncation methods in probability theory, *Encyclopedia of Statistical Sciences* (Wiley), **9** (1988), 355–357.
- [96] On randomly selected arithmetical sums, *Acta Math. Hungar.*, **52** (1988), 37–43. (with J.-M. De Koninck)
- [97] Variants of the graph dependent model in extreme value theory, *Communications in Statistics: Theory and Methods*, **17** (1988), 2211–2221.
- [98] Two series theorem, *Encyclopedia of Statistical Sciences* (Wiley), **9** (1988), 372–373.
- [99] A simple proof for the continuity of infinite convolutions of binary random variables, *Statistics and Probability Letters*, **7** (1989), 369–370. (with I. Kátai)
- [100] The selection of the domain of attraction of an extreme value distribution based on a set of data, In: *Extreme Value Theory* (eds.: J. Husler et al.), Lecture Notes in Statistics, Springer, Vol. **51**, 181–190, 1989. (with E. Castillo and J.M. Sarabia)
- [101] Conditional distributions and the bivariate normal distribution, *Metrika*, **36** (1989), 209–214. (with E. Castillo)
- [102] A new method for generating Bonferroni-type inequalities by iteration, *Mathematical Proceedings of the Cambridge Philosophical Society*, **107** (1990), 601–607. (with Y. Xu)
- [103] Bivariate distributions with Weibull conditionals, *Analysis Mathematica*, **16** (1990), 3–9. (with E. Castillo)
- [104] The continuity of the limiting distribution of a function of two additive functions, *Mathematische Zeitschrift*, **204** (1990), 247–252. (with I. Kátai)
- [105] Regularly varying expected residual life and domains of attraction of extreme value distributions, *Annales Univ. Sci. Budapest., Sect. Math.*, **33** (1990), 105–108. (with Y. Xu)

- [106] Characterization of bivariate models with gamma conditionals, (in Spanish) *Estadística Espanola*, **32** (1990), 439–450. (with E. Castillo, and J.M. Sarabia)
- [107] Characterizations of the logistic distribution, In: *The Logistic Distribution*, (ed.: N. Balakrishnan), Marcel Dekker, 1991, 169–188.
- [108] The extension of Williams’s method to the metric theory of general Oppenheim expansions, *Studia Sci. Math. Hungar.*, **26** (1991), 321–327.
- [109] Additive functions vanishing outside a given set of primes, *Publ. Math. Debrecen*, **39-40** (1992), 1–8. (with K.-H. Indlekofer)
- [110] The charatenzation of a distribution function by second moment of the residual life, *Communications in Statistics*, **21** (1992), 1463–1468. (with Ch. Hagwood)
- [111] Random sample sizes: limit theorems and charactenzations, In: *Probability Theory and Applications* (eds.: J. Galambos and I. Kátai), Kluwer, Dordrecht, 1992, 107 – 123.
- [112] Extensions of some univariate Bonferroni- type inequalities to multivariate setting, In: *Probability Theory and Applications* (eds.: J. Galambos and I. Kátai), Kluwer, Dordrecht, 1992, 143–154. (with M.-Y. Lee)
- [113] Univariate and multivariate Bonferroni-type inequalities: Methods for proof and questions of optimality, In: *Probability Theory and Applications* (eds.: J. Galambos and I. Kátai), Kluwer, Dordrecht, 1992, 155–164. (with Y. Xu)
- [114] Extensions of some extremal properties of prime divisors to Poisson limit Theorems, In: *The Grosswald Memorial Volume published by The Amer. Math. Soc.*, (ed.: M. Knopp), Contemporary Math., **143** (1993), 363–369.
- [115] Some optimal bivariate Bonferroni-type bounds, *Proc. Amer. Meth. Soc.*, **117** (1993), 523–528. (with Y. Xu)
- [116] Bonferroni-type and related inequalities in statistics: A survey, *Journal of Applied Statistical Science*, **2** (1994), 195–209.
- [117] An unreliable server characterization of the exponential distribution, *Journal of Applied Probability*, **31** (1994), 274–279. (with Ch. Hagwood)
- [118] Further studies of bivariate Bonferroni-type inequalities, *Journal of Applied Probability*, **31A** (1994), 63–69. (with M.Y. Lee)
- [119] Extreme value theory for applications, In: *Extreme Value Theory and Applications* (eds.: J. Galambos et al.) Kluwer, Dordrecht, 1994, 1–14.

- [120] Analytical and empirical study of the tails of probability distribution, In: *Extreme Value Theory and Applications* (eds.: J. Galambos et al.) Kluwer, Dordrecht, 1994, 199–209. (with N. Macri)
- [121] The development of the mathematical theory of extremes in the past half century, (in Russian), *Theory of Probability and its Applications*, **39** (1994), 272–293.
- [122] *Advanced Probability Theory*, 2nd edition, Marcel Dekker, New York, 1995.
- [123] Bivariate extensions of the method of polynomials for Bonferroni-type inequalities, *Journal of Multivariate Analysis*, **52** (1995), 131–139. (with Y. Xu)
- [124] Two sets of multivariate Bonferroni-type inequalities, In: *Statistical Theory and Application* (eds.: H.N. Nagaraja et al.) Springer, New York, 1995, 29–36. (with Y. Xu)
- [125] *Bonferroni-type Inequalities with Applications*, Springer, New York, 1996. (with I. Simonelli)
- [126] Univariate extreme value theory and applications, In.: *Handbook of Statistics*, Vol. **16**: Order Statistics and Their Application (eds.: N. Balakrishnan and C.R. Rao), North Holland, Amsterdam, 1996, 315–333.
