

INDEX OF VOLUME 37

<i>Giachetta, R., T. Gregorics, Z. Istenes and S. Sike:</i> Address standardization	5
<i>Zsók, V. and Z. Porkoláb:</i> Rapid prototyping for distributed D-Clean using C++ templates	19
<i>Weisz, F.:</i> Cesàro-summability of higher-dimensional Fourier series	47
<i>Agócs, Á., Z. Ács, A. Balaton and T. Lukovszki:</i> Toward a faster BitTorrent	65
<i>Bánsághi, A., B.G. Ézsiás, A. Kovács and A. Tátrai:</i> Source code scanners in software quality management and connections to international standards	81
<i>Burcsi, P.:</i> The commuter's paradox: why it takes longer to get home than to get to work	93
<i>Dezső, B., I. Fekete, D. Gera, R. Giachetta and I. László:</i> Object-based image analysis in remote sensing applications using various segmentation techniques	103
<i>Fogarasi, N. and J. Levendovszky:</i> Improved parameter estimation and simple trading algorithm for sparse, mean-reverting portfolios	121
<i>Fridli, S., P. Kovács, L. Lócsi and F. Schipp:</i> Rational modeling of multi-lead QRS complexes in ECG signals	145
<i>Góbi, A., Z. Szűgyi and T. Kozsik:</i> A C++ pearl – self-referring streams	157
<i>Hatwágner, M.F. and A. Horváth:</i> Maintaining genetic diversity in bacterial evolutionary algorithm	175
<i>Iványi, A.:</i> Degree sequences of multigraphs	195
<i>Iványi A., S. Pirzada and N.A. Shah:</i> Imbalances of bipartite multitournaments	215

<i>Kádek, T.:</i> Press-ready deduction trees in classical logic using point-plus-expressions	229
<i>Király, B.:</i> Generalized Haar-Fourier transform	239
<i>Kovács, P.:</i> ECG signal generator based on geometrical features	247
<i>Kupán, P.A. and R. Szász:</i> About a condition for starlikeness	261
<i>Máriás, Zs., T. Nikovits, T. Takács and R. Giachetta:</i> A study of storing large amount of inhomogeneous data in workflow management systems	275
<i>Németh, Zs.:</i> Some classes of uniformly convergent interpolation processes on the roots of Chebyshev polynomials	293
<i>Páli, G.:</i> Declarative scheduling of dataflow networks	311
<i>Robu, J. and A. Soós:</i> Approximation of stochastic differential equations driven by step fractional Brownian motion	339
<i>Tejfel, M., M. Tóth, I. Bozó, D. Horpácsi and Z. Horváth:</i> Improving quality of software analyser and transformer tools using specification based testing	355
