

Congratulation

In 2016 Ferenc Schipp

professor emeritus of the Faculty of Informatics of Eötvös Loránd University (Budapest, Hungary), was awarded by the Eötvös József Wrath of the Hungarian Academy of Science in the field of mathematics. The prize was presented to him by László Lovász, the President of the Academy, on the opening session of The Day of Hungarian Science.

The Eötvös József Wrath

was constituted by the Presidential Board of Hungarian Academy of Sciences in 1992 in order to appreciate outstanding scientific careers. The laureate is eligible to use the title *Laureatus Academiae/Laureata Academiae*.

Ferenc Schipp, doctor honoris causa of Eötvös Loránd University, is an eminent member of the domestic and international scientific communities in the area of pure, and applied mathematics, and informatics. Research and educational activities have always been in harmony, and of equal importance throughout his career. He is not only an acknowledged professional in the areas of harmonic analysis, numerical applications and related algorithms, but a well-respected, excellent university professor who became the role model of the succeeding generations. His exemplary career made him meritorious for the Eötvös József Wrath.

The Faculty of Informatics of Eötvös Loránd University and the Editorial Board of Annales express their warmest congratulation to him on receiving this highly respected award.
