

**CONTINUATION OF THE LAUDATION TO  
Professor Péter Simon  
on his 75th birthday**

by Sándor Fridli (Budapest, Hungary)

Péter Simon, Professor at the Department of Numerical Analysis, Eötvös Loránd University, turned 70 five years ago in 2019. His laudation on this occasion was published in this journal ([49 \(2019\), p. 15](#)).

By appointing him Professor Emeritus in 2019, the Faculty and the Department have expressed not only their respect and appreciation for his decades of work but also their expectation that he will continue to play an active role in the professional and public life of the University. Indeed, Professor Simon has since continued his professional activities as Professor Emeritus of our Department with unfailing enthusiasm and perseverance.

His commitment to quality teaching and to maintaining professional standards has remained unchanged. He has not hesitated to stand up for these values in various committees and forums when he felt that they were under threat. In particular, his important work as Chair of the Professorial Council deserves special mention in faculty decisions on strategic issues. He continues to be involved in improving the educational quality of young colleagues, who can always count on his supportive advice. His exemplary teaching is a benchmark for them.

We wish him strength and good health to continue his work with the same dedication for the benefit of us all.
