

LIST OF PUBLICATIONS

Ferenc Weisz

Books

- [b1] *Martingale Hardy Spaces and Their Applications in Fourier Analysis*, Lecture Notes in Math. vol. 1568, Berlin, Heidelberg, New York: Springer, Berlin 1994, 217 pp.
- [b2] *Summability of Multi-Dimensional Fourier Series and Hardy Spaces*, Mathematics and Its Applications, Kluwer Academic Publishers, Dordrecht, Boston, London. 2002, 350 pp.
- [b3] *Summability of Multi-Dimensional Trigonometric Fourier Series*, Surveys in Approximation Theory (SAT), **7** (2012), 1–179.
- [b4] *Convergence and Summability of Fourier Transforms and Hardy Spaces*, Applied and Numerical Harmonic Analysis, Springer, Birkhäuser, Basel, 2017, 446 pp.
- [b5] *Lebesgue Points and Summability of Higher Dimensional Fourier Series*, Applied and Numerical Harmonic Analysis. Springer, Birkhäuser, Basel, 2021, 303 pp.
- [b6] *Martingale Hardy Spaces and Summability of One-Dimensional Vilenkin–Fourier Series*, Springer, Birkhäuser, Basel. 2022, 633 pp. (with L.E. Persson and G. Tepnadze)

Papers published by international journals

- [1] Convergence of singular integrals, *Annales Univ. Sci. Budapest., Sect. Math.*, **32** (1989), 243–256.
- [2] Martingale Hardy spaces, *BMO* and *VMO* spaces with nonlinearly ordered stochastic basis, *Anal. Math.*, **16** (1990), 227–239.
- [3] Dyadic martingale Hardy and *VMO* spaces on the plane, *Acta Math. Hungar.*, **56** (1990), 143–154.

-
- [4] Martingale Hardy spaces for $0 < p \leq 1$, *Probab. Th. Rel. Fields.*, **84** (1990), 361–376.
 - [5] On duality problems of two-parameter martingale Hardy spaces, *Bull. Sc. Math.*, **114** (1990), 395–410.
 - [6] Interpolation between two-parameter martingale Hardy spaces, the real method, *Bull. Sc. Math.*, **115** (1991), 253–264.
 - [7] Inequalities relative to two-parameter Vilenkin–Fourier coefficients, *Studia Math.*, **99** (1991), 221–233.
 - [8] On the equivalence of some rearrangements of two-parameter Haar system, *Anal. Math.*, **18** (1992), 153–166.
 - [9] Interpolation between martingale Hardy and BMO spaces, the real method, *Bull. Sc. Math.*, **116** (1992), 145–158.
 - [10] Conjugate martingale transforms, *Studia Math.*, **103** (1992), 207–220.
 - [11] An application of two-parameter martingales in harmonic analysis, *Studia Math.*, **107** (1993), 115–126.
 - [12] Atomic Hardy spaces, *Anal. Math.*, **20** (1994), 65–80.
 - [13] Hardy spaces of predictable martingales, *Anal. Math.*, **20** (1994), no. 3, 225–233.
 - [14] One-parameter martingale inequalities, *Annales Univ. Sci. Budapest., Sect. Comp.*, **14** (1994), 249–278.
 - [15] The asymptotic behaviour of local times and occupation integrals of the N -parameter Wiener process in \mathbb{R}^d , *Probab. Th. Rel. Fields*, **98** (1994), 47–76. (with P. Imkeller)
 - [16] Martingale operators and Hardy spaces generated by them, *Studia Math.*, **114** (1995), 39–70.
 - [17] A new martingale equivalence theorem, *Annales Univ. Sci. Budapest., Sect. Math.*, **38** (1995), 39–46.
 - [18] Interpolation between continuous parameter martingale spaces, the real method, *Acta Math. Hungar.*, **68** (1995), 37–54.
 - [19] Strong summability of two-dimensional Walsh–Fourier series, *Acta Sci. Math. (Szeged)*, **60** (1995), 779–803.
 - [20] Duality results and inequalities with respect to Hardy spaces containing function sequences, *J. Theor. Probab.*, **9** (1996), 301–316.

-
- [21] Martingale BMO spaces with continuous time, *Anal. Math.*, **22** (1996), 65–79.
 - [22] Cesàro summability of two-dimensional Walsh–Fourier series, *Trans. Amer. Math. Soc.*, **348** (1996), 2169–2181.
 - [23] The boundedness of the two-parameter Sunouchi operators on Hardy spaces, *Acta Math. Hungar.*, **72** (1996), 121–152.
 - [24] Strong convergence theorems for two-parameter Walsh- and trigonometric-Fourier series, *Studia Math.*, **117** (1996), 173–194.
 - [25] An extension of an inequality due to Stein and Lépingle, *Colloq. Math.*, **71** (1996), 55–61.
 - [26] Two-parameter Hardy–Littlewood inequalities, *Studia Math.*, **118** (1996), 175–184.
 - [27] Cesàro summability of one- and two-dimensional Walsh–Fourier series, *Anal. Math.*, **22** (1996), 229–242.
 - [28] Some maximal inequalities with respect to two-parameter dyadic derivative and Cesàro summability. *Applic. Anal.*, **62** (1996), 223–238.
 - [29] Cesàro summability of multi-dimensional trigonometric-Fourier series, *J. Math. Anal. Appl.*, **204** (1996), 419–431.
 - [30] (H_p, L_p) -type inequalities for the two-dimensional dyadic derivative, *Studia Math.*, **120** (1996), 271–288.
 - [31] Strong summability of two-dimensional trigonometric-Fourier series, *Annales Univ. Sci. Budapest., Sect. Comp.*, **16** (1996), 391–406.
 - [32] Inequalities and duality results with respect to two-parameter strong martingales, *Anal. Math.*, **23**, (1997), 45–75.
 - [33] Cesàro summability of two-parameter Walsh–Fourier series, *J. Approx. Theory*, **88** (1997), 168–192.
 - [34] Cesàro summability of one- and two-dimensional trigonometric-Fourier series, *Colloq. Math.*, **74** (1997), 123–133.
 - [35] Paley type inequalities for Vilenkin-Fourier coefficients, *Acta Sci. Math. (Szeged)*, **63** (1997), 107–124. (with P. Simon)
 - [36] Cesàro summability of two-parameter trigonometric-Fourier series, *J. Approx. Theory*, **90** (1997), 30–45.

- [37] Hardy type inequalities for two-parameter Vilenkin–Fourier coefficients, *Studia Math.*, **125** (1997), 231–246. (with P. Simon)
- [38] Tree martingales and almost everywhere convergence of Vilenkin–Fourier series, *Math. Pannonica*, **8** (1997), 17–36. (with F. Schipp)
- [39] Riemann summability of two-parameter trigonometric–Fourier series, *East J. Approx.*, **3** (1997), 403–418.
- [40] Martingale Hardy spaces and the dyadic derivative, *Anal. Math.*, **24** (1998), 59–77.
- [41] Uniqueness of two-parameter dyadic martingales and Walsh–Fourier series, *Math. Pannonica*, **9** (1998), 131–140.
- [42] Hardy–Littlewood type inequalities for Vilenkin–Fourier coefficients, *Anal. Math.*, **24** (1998), 131–150. (with P. Simon)
- [43] The maximal Cesàro operator on Hardy spaces, *Analysis*, **18** (1998), 157–166.
- [44] (C, α) means of d -dimensional trigonometric–Fourier series, *Publ. Math. Debrecen*, **52** (1998), 705–720.
- [45] Riemann summability of multi-dimensional trigonometric–Fourier series, *Approx. Theory Appl.*, **14** (1998), 64–74.
- [46] Bounded operators on weak Hardy spaces and applications, *Acta Math. Hungar.*, **80** (1998), 249–264.
- [47] The maximal Fejér operator of Fourier transforms, *Acta Sci. Math. (Szeged)*, **64** (1998), 515–525.
- [48] Weak martingale Hardy spaces, *Probab. Math. Statist.*, **18** (1998), no. 1, 133–148.
- [49] Atomarnije razlozenija i neravenstva dlja vectornoznatsnich martingalov s diskretnim vremenem, *Teor. Veroyatnost. i Primenen.*, **43** (1998), no. 3, 588–598. (with Yu.S. Mishura)
- [50] Riesz means of Fourier transforms and Fourier series on Hardy spaces, *Studia Math.*, **131** (1998), 253–270.
- [51] Nerivnosti dlja vectornoznatsnich martingaliv z neperervnim tsasom, *Teor. Imovir. Mat. Stat.*, **58** (1998), 8–23. (with Yu.S. Mishura)
- [52] The maximal Fejér operator of multi-dimensional Fourier transforms, *East J. Approx.*, **4** (1998), 491–503.

-
- [53] Atomic decompositions and inequalities for vector-valued discrete-time martingales, *Theory Probab. Appl.*, **43**, no. 3, (1998), 487–496. (with Yu.S. Mishura)
 - [54] Critical dimensions for the existence of self-intersection local times of the N -parameter Brownian motion in \mathbb{R}^d , *J. Theor. Probab.*, **12** (1999), 721–737. (with P. Imkeller)
 - [55] Weak compactness and convergence in two-parameter martingale Hardy spaces, *Math. Pannonica*, **10** (1999), 139–151.
 - [56] Fejér means of two-dimensional Fourier transforms on $H_p(\mathbb{R} \times \mathbb{R})$, *Colloq. Math.*, **82** (1999), 55–66.
 - [57] The maximal Fejér operator on the spaces $H_p(\mathbb{R} \times \dots \times \mathbb{R})$, *Anal. Math.*, **25** (1999), 315–324.
 - [58] Inequalities for vector-valued martingales with continuous time, *Theory Probab. Math. Statist.*, **58** (1999), 9–25. (with Yu.S. Mishura)
 - [59] Maximal estimates for the (C, α) means of d -dimensional Walsh–Fourier series, *Proc. Amer. Math. Soc.*, **128** (2000), 2337–2345.
 - [60] Strong convergence theorem for two-parameter Vilenkin–Fourier series, *Acta Math. Hungar.*, **86** (2000), 17–38. (with P. Simon)
 - [61] The maximal Riesz operator of two-dimensional Fourier transforms and Fourier series on $H_p(\mathbb{R} \times \mathbb{R})$ and $H_p(\mathbb{T} \times \mathbb{T})$, *J. Approx. Theory*, **102** (2000), 21–45.
 - [62] The two-parameter dyadic derivative and the dyadic Hardy spaces, *Anal. Math.*, **26** (2000), 143–160.
 - [63] Two-dimensional conjugate martingale transforms, *Acta Math. Hungar.*, **87** (2000), 11–22.
 - [64] Two-parameter Paley type inequalities with respect to Vilenkin systems, *Acta Sci. Math. (Szeged)*, **66** (2000), 193–209. (with P. Simon)
 - [65] Riesz means of d -dimensional Fourier transforms and Fourier series, *Analysis*, **20** (2000), 121–135.
 - [66] A generalization of a theorem due to Marcinkiewicz, *East J. Approx.*, **6** (2000), 1–20.
 - [67] The maximal (C, α, β) operator on $H_p(\mathbb{T} \times \mathbb{T})$, *Approx. Theory Appl.*, **16** (2000), 52–65.

- [68] Double points of the Brownian sheet in \mathbb{R}^d and the geometry of the parameter space, *Stochastics and Stochastics Reports*, **70** (2000), 165–211. (with P. Imkeller)
- [69] The maximal (C, α, β) operator of two-parameter Walsh–Fourier series, *J. Fourier Anal. Appl.*, **6** (2000), 389–401.
- [70] (C, α) means of several-parameter Walsh- and trigonometric-Fourier series, *East J. Approx.*, **6** (2000), 129–156.
- [71] A generalization for Fourier transforms of a theorem due to Marcinkiewicz, *J. Math. Anal. Appl.*, **252** (2000), 675–695.
- [72] θ -summation and Hardy spaces, *J. Approx. Theory*, **107** (2000), 121–142.
- [73] Multi-parameter unbounded Ciesielski systems and convergence results, *East J. Approx.*, **6** (2000), 397–420.
- [74] Hardy–Littlewood inequalities for two-parameter Vilenkin–Fourier coefficients, *Analysis*, **21** (2001), 1–15. (with P. Simon)
- [75] Free lunch and arbitrage possibilities in a financial market model with an insider, *Stoch. Proc. Appl.*, **92** (2001), 103–130. (with P. Imkeller and M. Pontier)
- [76] On the two-parameter Vilenkin derivative, *Math. Pannonica*, **12** (2001), 105–128. (with P. Simon)
