

INDEX OF VOLUME 58

<i>Fridli, S.</i> : To the memory of Professor Ferenc Schipp	7
<i>Anastassiou, G. A.</i> : Neural networks in infinite domain as positive linear operators	15
<i>Argyros, I. K. and S. George</i> : Extended Newton's method for solving generalized equations under Kantorovich's-type weak conditions	31
<i>Barczy, M. and Zs. Páles</i> : A convexity-type functional inequality with infinite convex combinations	47
<i>Benczúr, A., B. Molnár and Gy. I. Szabó</i> : On the role of novel extended relations in document centric information system design	57
<i>De Koninck, J.-M. and I. Kátai</i> : New families of normal numbers constructed from existing ones	99
<i>Fábián, G.</i> : Monte Carlo method for estimating eigenvalues of symmetric matrices	111
<i>Gát, Gy., J. Márky-Zay and R. Toledo</i> : Multistep algorithm to solve general Riccati differential equations by Walsh polynomials approach	125
<i>György, Sz. and S. Kovács</i> : Stability preserving in reaction-diffusion systems	141
<i>Hue, D. T.</i> : A note on division rings with involution	157
<i>Indlekofer, K.-H. and E. Kaya</i> : Estimates for multiplicative functions, II.	167
<i>Kátai, I., B. M. M. Khan and B. M. Phong</i> : On the equation $F(n^2 + 1) = bF(n^2 - 1) + c$	177
<i>Kovács, S. and G. Tóth</i> : A reproducing kernel framework for interpretable parameter estimation and learning in dynamical systems	191
<i>Légrády, D., Á. Rábelly and Á. Zlehovszky</i> : Hybrid OSEM-PDHG reconstruction for SPECT with non-smooth total variation regularization	209

<i>Li, J. and V. Zsók</i> : Energy-efficient lazy group membership protocol implementation in Haskell	231
<i>Lócsi, L.</i> : Fractals on the hyperbolic plane using Chebyshev style scaling functions	251
<i>Stanković, R. S., M. Stanković, C. Moraga and J. Astola</i> : Haar spectra of Generalized Boolean bent functions	269
<i>Weisz, F.</i> : Walsh–Fejér means and weighted Hardy spaces	285
<i>Yamamuro, K.</i> : A weighted prime number race through some perspective of probability theory	299
